for empowerment of women has been constituted. The numbers of women in parliament and state legislatures have increased.

Children Studying

3. Progress in Economic Sphere

Today women from all classes, work in industries, schools, colleges, hospitals, offices and commercial institutes at high posts. In rural areas also 75% of the women are earning their livelihood by doing domestic work, work in education and industries.

4. Social Awareness

Women working in different areas

Many women have given up purdah and stepped out of the four walls of their home to breathe in fresh open air. Now after becoming indifferent to caste rules, and fundamentalism, they consider inter-caste marriage, love-marriage, widow remarriage and late marriage better. They are working in social welfare through the medium of different women organizations and clubs.

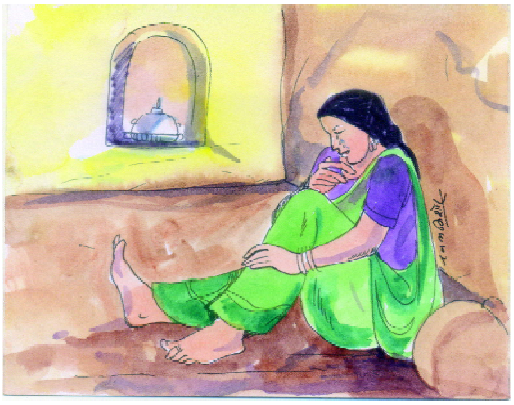

In today's changing circumstances a woman cannot be kept just as a maid. Their importance as a friend and colleague is rising due to which there is an increase in their familial rights. Children's education, usage of family income and in the area of home management their participation has increased. Now like man they have equal rights.

5. Legal Rights

Indian government and the state government, to improve the condition of women, have made laws to give them special rights.

- On attaining 18 years of age they have the right to marry a person of their choice and wish.
- After marriage the rights to keep their identity, name and surname instead of her husband's name or surname.
- Right to manage her stri-dhan (articles, jewellery, wealth and property received from her parents and inlaws).
- Right to the custody of their children if divorced or widowed.

- Right to file a petition in the court for separation from a husband, who tortures physically and mentally, is an adulterous or is a lunatic.
- Right to maintenance after a divorce to meet her expenses.
- Right to a share in ancestral property.
- Right to an equal share in the property of in-laws after husband's death.

A women - Victim of Torture

These rights and the passing of the following social acts have contributed in lifting the status of women in the past few years.

- **Prevention of Domestic Violence against Women Act 2001**

Since 1983 domestic violence was acknowledged as a problem and cruelty towards married women was a crime. It was paired with dowry death to prevent violence against women, and an act has been made. Under this act a victimized woman can file a petition in the court and get justice.

Victim of domestic violence

- **Alimony for those separated under the amendment act 2001**

Pregnent women check-up in hospital

If a woman is deserted by the husband, then in this situation, the Central Government has brought a law to provide alimony. Under this act, all the applications for alimony are passed by the court within 60 days. Earlier an initial amount of Rs. 500 had been fixed for women living separately from their husbands. After the amendment, the alimony to be given to the wife and children will be decided on the basis of actual income of husband. This way the women will get a sufficient amount on time.

- **Efforts to prevent Female Foeticide**

According to Pre-delivery and pre-natal Diagnostic Technique Act 1994, finding out the gender during pregnancy has been declared illegal. If we misuse this technique, there is a provision of fine from Rs. 10,000 to Rs. 15,000 and a imprisonment of 3 to 5 years. To implement the act strictly, the Supreme Court in 2001 directed the government to take specific steps to stop foeticide.

3. In which field are the women working now a days?

_____

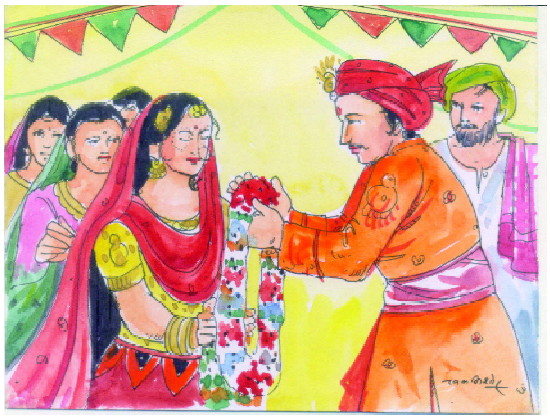

4. What rights are available to women after divorce?

_____

5. Which law is made to prevent domestic violence?

_____

3.5 Dowry - a curse for Society

Bride groom at Phulwa's house

Bodhlal was very happy. Kaushalya was also floating in the air. It was their daughter's marriage. Phulwa's friends were adorning her up; bantering around with loud laughter's and jokes, and guffans.

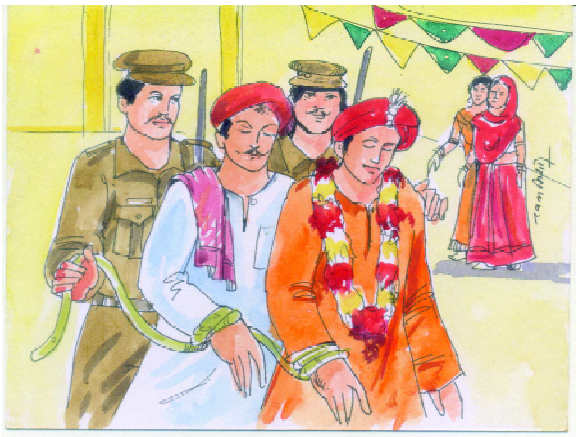

The marriage party came with pomp and revelry. They were welcomed with warmth and hospitality. After the puja at the front door there was food and drinks. But when the time for phera's came, the bridegroom's father was adamant to take dowry. He demanded fifty thousand rupees in cash. Bodhlal and Kaushalya's happiness was shattered. They had spent more than their capacity. But now they did not have enough money to give in cash. They cried and pleaded, but the bridegroom's father did not relent. People tried to make him see reason but it did not have any effect on him. In the end every one gave it up. Bodhlal and Kaushalya were heart broken. Phulwa's dreams were in shambles.

Ready to take the marriage party back

The bridegroom is father was preparing to take his marriage party back.

Then a police jeep came and stopped. There was chaos panic in the marriage party. The police arrested the bridegroom and his father. Everyone was surprised as to how did the police come? This was known only to Phulwa. It was she who sent her uncle to police station to file a report about demand of dowry. You might have heard such tales about right conscious girls like Phulwa.

The police taking away the bridegroom and his father.

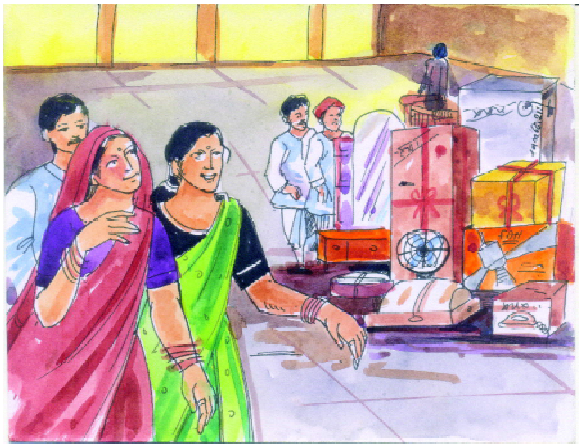

Many girls have sent back the marriage parties of people who demanded dowry and refused to marry. Practice of dowry is a curse in our society. Marriage parties have at times returned, when bride's father could not arrange dowry. Thousands of homes are ruined because of dowry. Many daughters remain unmarried. It is necessary to stop this malpractice.

3.5.1 What is Dowry?

Dowry are gifts given by the girl's family and relative at the time of her marriage, before her marriage and after the marriage.

In ancient time a daughter's marriage was thought to be a form of "Kanyadan". The girl's mother - father gave her necessary articles of household and sent her off, so that she did not face any difficulty in starting her life in a new household.

This endowment was given willingly and according to their capacity. Slowly, slowly it became a tradition. The boy's side started thinking of it as their right. Ancient practice of charity took the form of the ugly dowry practice. It became a curse for society.

Articles of Dowry

3.5.2 Reasons for Dowry

Earlier the dowry practice was confined to a few specific castes and classes. Now this evil practice has pervaded equally to other classes and castes. The reasons for such widespread expansion are many:

1. Extreme attraction to wealth

These days taking money in marriage has become a basis of social and family prestige. Giving colored television, scooter, refrigerator, car have become a criteria of prestige. It is not easy for a person from the middle class to afford all these things. For this reason the boy's side demands these things from the girl's parents.

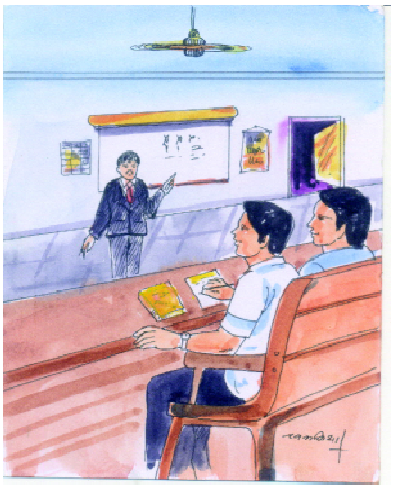

Discussion on Dowry goods

2. Limited scope to choose life partner

Our Society is divided into a number of castes and sub- castes. Normally a girl is married into her own caste. This makes it difficult to find a suitable match. This is the reason why the boy's side demands so much dowry.

3. Social Display

Ostentation contributes a lot to the malpractice of dowry. People ask for dowry because of false honor and pride. They tell others how much dowry their boy has got. If a family does not get any dowry, their family members also talk about it. They say that the boy must be lacking and for that reason he has not got any dowry. At the times the girl's side also gives dowry just to flaunt their wealth.

Students studying in the class.

4. Expensive Education

In present times, education has become expensive and the parents spend more than they can afford on their son's education. They want to make good their money by dowry received at the time of their son's marriage. Educated boys receive good jobs and prestige in the society. Their number is few. The demand for dowry is increasing for educated bridegrooms.

3.5.3 Adverse effect of the Dowry Practice

Dowry practice has led astray the whole society and made it selfish. The boy is considered a bank cheque. If the boy is appointed to a good job or is a doctor, lawyer, engineer etc., the demand for the dowry increases. Curiously the people who take dowry are the men who criticize it also.

The harms of dowry practice are:

1. **Ethical downfall**

   At the time of their son's wedding the family members forget all about rules and law. At times a few greedy people threaten to return the marriage party with the intention to dishonour bride's parents.

2. **Indebtedness**

   To fulfil the demand for dowry the girl's father has to borrow money. He spends his whole life in repaying that loan.

3. **Mismatch Marriage**

   Unable to give dowry, at times, a girl is married off to a boy who is much older, as she is not able to get a suitable bridegroom.

4. **Unhappy married life of girls**

   Unable to get dowry according to their wishes, the in-laws harass the girls. Sometimes the girls commit suicide.

Unhappy married life

5. **Increase in the rate of suicide among the girls**

   At times the girls are not married at right time due to lack of dowry. The girls, who depend on their parents remain disturbed and for this reason they commit suicide.

6. **Increase in the number of unmarried girls**

   Unable to give dowry, girls form the poor families are not able to get a suitable match. Girls who are aware but belong to financially weak families prefer to remain unmarried rather than get married to a less educated boy or one who comes from an ordinary family. Thus many girls are left unmarried

3.5.4 Solution to the problem

1. The youth will have to take initiative

The government makes many laws to prevent dowry practices but their impact is not visible. For this we have to change our way of thinking. The youth must take the initiative. Then only the slogan that men and women are equal may be meaningful. Persecution of women will end.

2. Dowry and Government

On 9th May, 1961, the Indian Parliament passed the "Prohibition of Dowry Law". In the year 1983 the Supreme Court directed the central and state governments that any suspicious death within the first seven years of marriage should be thoroughly investigated.

3. Give incentives to inter-caste marriages
4. Girls should be made self sufficient.
5. Educate the girls.
6. Right to choose their life partners

3.5.5 Dowry in the eyes of Law

In the eyes of law, giving and taking dowry, both are an offence. In 1961, the Indian Government passed a law for prevention of dowry. It is known as Prohibition of Dowry Act 1961. Under this act all persons involved in the exchange of dowry are liable for punishment. This does not in any way mean that we cannot give gifts in a daughter's marriage. We can give gifts, but only those which mother and father can afford and are given willingly without any pressure.

3.5.6 Gifts given are Stri- Dhan

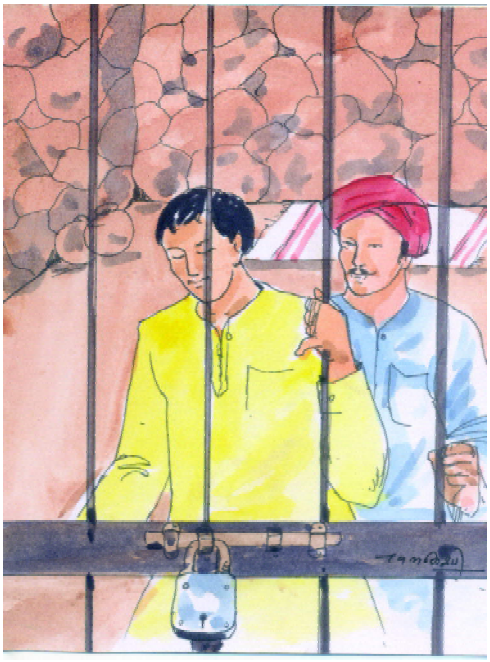

Gifts given before marriage, at the time of marriage and after the marriage are not considered as dowry. It is called 'Stri-Dhan'. Only the woman concerned has a right on the Stri-dhan. No one else has a right to it. The woman can give those gifts to anyone. We must make a list of all the gifts received by the bride at the time of her marriage. In this list the name of the gift, its value, name and address of the person who gave it etc. must be clearly written. At the bottom of the list, there must be, the bride's and bridegroom's signatures or thumb impression.

3.5.7 Who gets how much punishment?

- A person who takes dowry or the person who gives dowry can be jailed for a minimum period

of 5 years and fined Rs, 15,000/- as penalty. The punishment also applies to the middleman who was involved in the exchange of dowry.

- If the dowry amount is more than Rs. 15,000 then the penalty will be equal to the amount of dowry.
- A person demanding dowry can be jailed for a period of 6 months to 2 years and penalized for Rs. 10,000/-.
- Whoever gives an advertisement for dowry can be sent to jail for a period of 6 months to 5 years and pay a penalty of Rs. 15,000/-

Guilty of dowry demand in jail

3.5.8 Dowry Death

We often hear, read and see incidents about a daughter-in-law's death due to dowry. Many daughters-in-laws are compelled to commit suicide. To prevent these dowry deaths there is a provision for punishment in the Indian Penal Code,1860, section 304B,.

3.5.9 What is considered Dowry Death?

It will be considered a dowry death if these three things are involved in it:

- A daughter-in- law has died within seven years of marriage.
- Death is committed in an unusual way, like death due to burning, death due to hanging or suicide etc.
- Before death there was a dowry demand and she was harassed for it.

3.5.10 Punishment to the culprits of dowry death

Husband, mother-in-law, father-in-law, brother-in-law and other relatives who are involved and whose guilt is proved are liable to be punished.

According to Indian Penal Code, Section 304B, the culprit can be sentenced to jail from 7 years to life imprisonment.

Let's see, what you have learnt 3.5

I. For correct answer put a (✓) and for wrong answer put a (✗).

i. There is not harm in giving and taking dowry. ( )

ii. Dowry is a curse for society. ( )

iii. In the eyes of the law, giving and taking dowry is an offense. ( )

iv. Husband has a right to a woman's stri-dhan. ( )

v. People involved in dowry death are liable for punishment. ( )

vi. It will be considered a dowry death if the woman has died after seven years of her marriage. ( )

II. Fill in the blanks:

i. These days taking money in a marriage has become a basis ……..

ii. People take dowry to collect ……

iii. They spend more money on their son's education and try to make good this …….. by taking dowry.

iv. The girl's family spend their ……. Is returning this loan.

v. The …… must take the initiative to stop dowry practice.

Let's Revise

- There are some problems in a large family. Therefore, we should look at the benefits of a small family.
- Education is necessary for all, especially, if the girls and women are educated, it will be beneficial for them.
- In our society, it is necessary to make efforts at social and political level to have equality between men-women.
- A woman's respect can be maintained only if there is an end to dowry practice.

Exercise

I. Fill in the blanks:

i. There is always …… in a large family.

Our Freedom Struggle

We will learn in this lesson

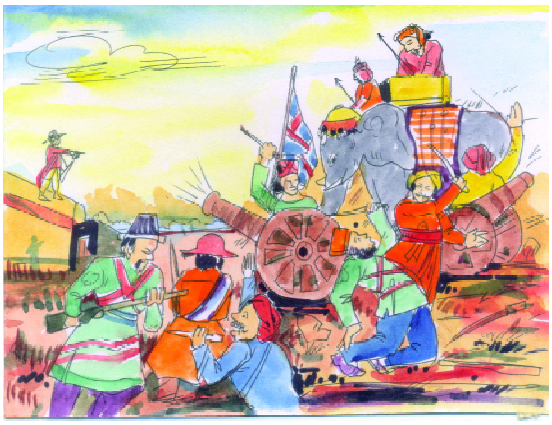

- The establishment of British rule in India
- The contribution of different states and sections of people in the freedom struggle
- The contribution of Gandhiji and other leaders in the freedom struggle
- The importance of safeguarding our Independence

In ancient times India used to be known as the golden bird. At that time India's trade was spread across half the world. There was great demand for Indian spices, specially black pepper and cardamom, in European countries. This trade was carried out by the traders of Arab countries. In European countries Indian goods fetched a very high price. Vasco de Gama, a sailor from Portugal, was the first to come to India after a long sea voyage. His ship docked at the port of Calicut. After Vasco de Gama's journey the Portuguese started trading with India. They would buy goods at cheap prices from India and sell them at high prices in European markets. In a short time Portugal became a rich country. This made countries such as Britain, Italy and France also keen to do trade with India. Around this time, after the death of Aurangzeb in 1707, the condition of the Mughal Empire was not good.

Small kingdoms sprang up in different parts of India. All this made it easier for European nations to find their footing in India.

4.1 Establishment of British rule in India

India was a rich country then Mughal kings were growing weak. Apart from Portugal other European nations such as Holland, France and England also started trading here. In order to trade with India English traders set up the East India Company in 1600. This company first set up business establishment in Surat, Chennai, Kolkata and Mumbai. These cities were already centers of trade. The British kept cannons at their business establishments. They recruited soldiers. All the countries wanted to have trade monopoly with India and so would keep fighting among themselves. East India Company emerged as the winner in these fights. It gained trade monopoly with India. The British had come to India to exploit it economically and later they became its rulers.

Nawab Siraj ud-daulah of Bengal did not like the British setting up their establishments in Kolkata and keeping soldiers there. This led to tension between the Nawab and the British. In the battle of Plassey in 1757 Nawab Siraj ud-daulah of Bengal was defeated. The company took possession of Bengal. This victory was the beginning of British Empire in India. The company became the zamindar of Bihar, Bengal and Orissa. It took control of a major part of India. In order to collect money the British now started committing atrocities on the people. Farmers were stopped from farming according to their free will. Instead of wheat they were forced to grow opium, indigo and cotton.

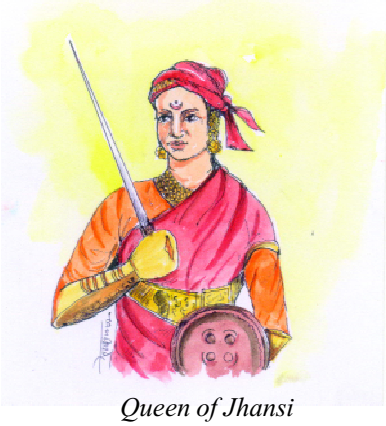

Nawab Siraj ud-daulah

Haider Ali

At the time when the English were spreading their empire in India Haider Ali was the Sultan of Mysore. He was a brave, courageous and intelligent person. There were battles between him and the British. In both the battles he taught the British a lesson. The British were scared of him. After his death, his son Tipu Sultan kept the English engaged in battles. He kept fighting for two years till his death in the battlefield.

The British started grabbing the kingdoms of the Indian rulers. This happened with the Nawab of Oudh and the queen of Jhansi. The company made laws which did not allow Indians to set up factories. They did not have the freedom to do business. Workers could not take up work of their choice and people could not travel at their free will. This harmed the country a great deal. The people of India became slaves in their own country.

Queen of Jhansi

British atrocities kept increasing. The anger of Indians against the British also kept increasing. This anger finally burst out in the shape of a revolt. This revolt was spread across a major part of the country. In Indian history this revolt is termed as the first war of independence.

Let's see, what you have learnt 4.1

Put a (✓) on the correct and a (✗) on the incorrect sentences-

i. In ancient times India was called the golden bird. ( )

ii. The Mughal Empire became strong after the death of Aurangzeb. ( )

iii. The traders of Portugal formed the East India Company. ( )

iv. The British took control of Bengal after the battle of Plassey. ( )

v. The British started committing atrocities on the Indian farmers. ( )

4.2 First fight for Independence

1857 is a very important year in India's history of freedom struggle. There was anger in India's farmers, workers, weavers, nawabs and kings against the British. The Indian soldiers in the British army were also angry at the unequal treatment given to them. On 10 May, 1857 a sepoy named Mangal Pandey in the Barackpore branch of the Bengal regiment of the British army started the revolt. He refused to fire the cartridges greased with the lard of cow and pig. The soldiers had to bite these cartridges with their teeth in order to fire them. Mangal Pandey shot dead a British officer. He was sentenced to death. When this news reached Meerut cantonment the soldiers over there too revolted. Many Englishmen were killed. Imprisoned soldiers were set free. The sepoys reached Delhi the next day. They took control of the Red Fort and declared the old king Bahadur Shah Zafar as the emperor of India.

Mangal Pandey

Bahadur Shah Zafar

The fire of revolt spread all across North India. Peshwa Nana Sahib in Kanpur, Rani Laxmi Bai of Jhansi and Tantya Tope in Central India, Begum Hazrat Mahal in Lucknow and Kunwar Singh in Bihar led the revolt. In Allahabad, Bundelkhand, Kanpur, Delhi, Awadh, Ruhelkhand and parts of Bihar apart from the soldiers even the common people took part in this fight. The mass killings of Britishers started in many towns. For the first time kings, zamindars, soldiers and the common people fought together for freedom. However, though fought bravely, the revolt could not succeed. This was because the Britishers had modern arms whereas the Indians fought with bows and arrows, axes, swords, spears etc. Nevertheless, the revolt shook the foundations of the East India Company. Queen Victoria of England took the reins of administration of India in her own hands. The rule of East India Company in India came to an end. After 1857 the Viceroy became the ruler of India on behalf of the British government.

Begum Hazrat Mahal

At this time Maharaja Ranjit Singh was the ruler of Punjab. He extended the Sikh empire by taking control of Kangra, Cuttack, Multan and Peshawar. Cleverly Ranjit Singh signed a treaty with the British. Because of the treaty, for a long time, the British could not go to the west through Punjab.

Although powerful yet the Marathas, Nizam and Raja Ranjit Singh could never unite against the British. This made it easy for the British to extend their empire.

Let's see, what you have learnt 4.2

Fill in the blanks:

i. The year 1857 is a very ..... year in Indian history.

ii. Mangal Pandey refused to fire the ..... .

iii. The people engaged in the revolt made ..... the emperor.

iv. Queen ..... of England took the reins of administering India in her own hands.

4.3 How we got our freedom

Gopal Krishna Gokhale

The 1857 fight for independence did not stop. The atrocities and exploitation by the Britishers increased. The struggle for independence also continued though its method changed. People realized that till the British were ruling the country they could not be happy. In 1885 a British officer named Allen Octavian Hume founded the Indian National Congress. In the beginning the aim of the congress was to attract the British attention towards the condition of the Indians. Through the efforts of Dada Bhai Naoroji and Gopal Krishna Gokhale Indians got a platform in the form of the congress.

Gradually the number of members of the Congress started increasing. Apart from the educated even the common man started joining it. Men of new ideas such as Bal Gangadhar Tilak, Madan Mohan Malviya, Lala Lajpat Rai, Arvind Ghosh, Ajmal Khan and Bipin Chandra Pal joined the Congress. With their coming the Congress was divided into two groups: Moderates and Radicals. Those with revolutionary ideas were in the Radical group while those who wanted to confront the British in peaceful ways were a part of the moderate group. In the meantime, in 1916 Mahatma Gandhi became active in Indian politics. He had already faced the British in South Africa. The Congress gave the reins of the freedom movement in the hands of Mohandas Karamchand Gandhi. Later he was known as Mahatma Gandhi.

Bal Gangadhar Tilak

Madan Mohan Malviya

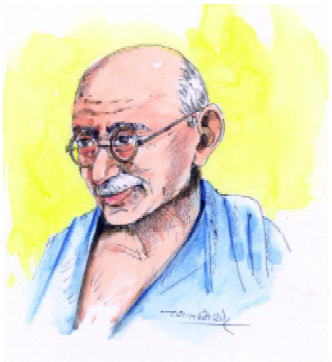

Lala Lajpat Rai

Ravindranath Tagore

Mohandas Karamchand Gandhi had been a lawyer in Africa. He had lived there for 20 years. Over there he had seen the British discriminating against and committing atrocities on those with dark skin and also on Indians. When he came to India he saw the British doing injustice to the Indians and committing atrocities. Therefore he decided to join the freedom struggle.

Mahatma Gandhi

Gandhiji saw that there were many evils in Indian society. He realized that without removal of these evils, he could not fight with strength. He

tried to remove untouchability and caste system from society. He worked towards getting respect for women and those belonging to the backward class. He himself lived in a simple manner.

Gandhi ji asked the people to adopt the policy of non-violence or Ahimsa in the fight for independence. He started the Non Co operation Movement and said that the British would receive no support from us for any work but all this would be done in a peaceful manner. Lakhs of people joined this movement. Angered by police misbehavior agitators set fire to a police station in a place in Uttar Pradesh called Chauri Chaura. A police station was set on fire. Some policemen died in this incident. Gandhiji recalled the movement.

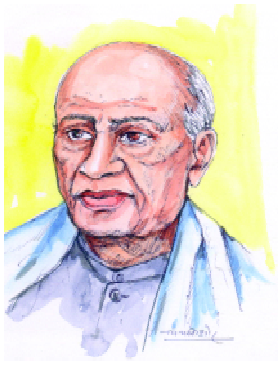

In 1917 Gandji ji started the Satyagraha Movement in Champaran district of Bihar in protest against atrocities on farmers by the British. It was a peaceful movement. In this peaceful movement Gandhiji was victorious. With the arrival of Gandhi ji the struggle for independence spread to all states of the country. The leaders in the different states of India as well as the common man joined the struggle for freedom. Distinguished leaders such as Pandit Moti Lal Nehru, Jawahar Lal Nehru, Subhash Chandra Bose, Chakravarti Rajagopalachari, Sardar Vallabh Bhai Patel, Dr Rajendra Prasad, Abul Kalam Azad, Sarojini Naidu, Aruna Asaf Ali were a part of the freedom struggle.

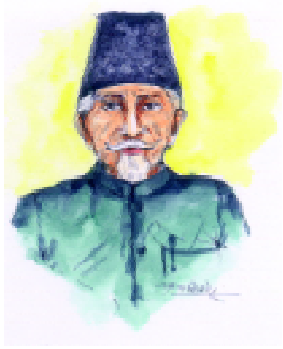

Jawahar Lal Nehru

Subhash Chandra Bose

Sardar Vallabh Bhai Patel

Abul Kalam Azad

Sarojini Naidu

Aruna Asaf Ali

The British government became nervous on seeing the increasing strength of the Congress. It made new laws in order to suppress the freedom movement. People took out processions at various places. They assembled at different places to oppose the new laws. On 13 April, 1919 in Amritsar's Jallianwala Bagh British soldiers opened fire raining bullets at the people assembled peacefully. Hundreds of unarmed people were killed. After this incident patriotic revolutionaries got together. Revolutionaries such as Chandrashekhar Azad, Bhagat Singh, Ram Prasad Bismil, Batukeshwar Dutt, Ashfaque Ullah Khan, Rajguru and Sukhdev kept the torch for freedom lit and aflame.

Chandrashekhar Azad

Ram Prasad Bismil

Ashfaque Ullah Khan

Batukeshwar Dutt

Bhagat Singh

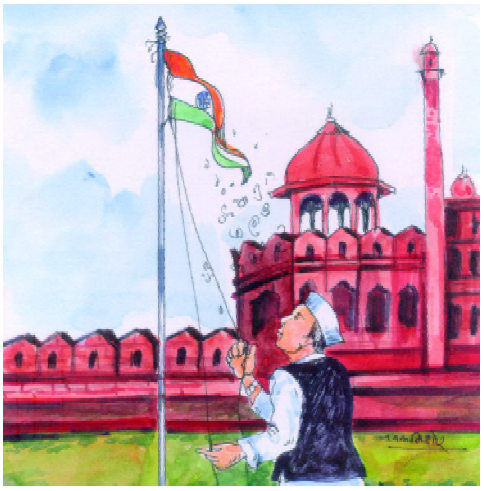

In 1920 Gandhi ji launched the Non Cooperation Movement to oppose the Rowlett Act and the Jallianwala Bagh incident. This rendered the government handicapped. In 1929 Jawaharlal Nehru made a demand for 'Purna Swaraj'. At that time only the government had the right to make salt. On 6 April, 1930 Gandhi ji completed his Dandi March by breaking the 'salt law'. This is known as the Civil Disobedience Movement. In 1942 under the leadership of Gandhiji the people launched the Quit India Movement. Gandhiji said that we would either gain independence or die. The Azad Hind Fauj of Subhash Chandra Bose also engaged the British army.

Rowlett Act

Finally on 15 August, 1947 India gained independence from the British Empire. As India's first Prime Minister Pandit Jawaharlal Nehru unfurled the tricolor from the ramparts of the Red Fort in Delhi. Since then every year 15 August is celebrated as Independence Day., We gained this freedom after a lot of struggle. We should protect it with our lives. It is said that even in our dreams slavery is not a happy situation.

Let's see, what you have learnt 4.3

Put a (✓) on the correct answer.

i. When was the first battle against the British fought? (1857/ 1757/1947)

ii. When did Jawaharlal Nehru make the demand for Purna Swaraj? (1920/ 1929/1942)

iii. Who refused to fire greased cartridges?
(Managal Pandey/ Bhagat Singh/ Chandrashekhar Azad)

iv. Who founded the Azad Hind Fauj?
(Mahatma Gandhi/ Rabindra Nath Tagore/ Subhash Chandra Bose)

Let's Revise

- In ancient times India was known as the golden bird.
- There was a great demand for our silk-cotton clothes and spices in the European markets.
- After Aurangzeb's death in 1707 the Mughal Empire became unstable.
- The traders of Portugal, England and France started trade with India.
- English traders established the East India Company to trade with India.

- The company defeated all foreign traders and established a monopoly over trade with India. Slowly the British started governing India.
- In 1857 Mangal Pandey, Laxmibai, Tantya Tope, Begum Hazrat Mahal, Kunwar Singh etc openly opposed British imperialistic policies. This opposition slowly turned into a revolt. This was India's first fight of Independence.
- In 1885 A. O. Hume founded the Indian National Congress. Later Mahatma Gandhi took over the responsibility of the freedom struggle.
- With the support of Motilal Nehru, Jawaharlal Nehru, Subhash Chandra Bose, Sardar Patel, Maulana Abul Kalam Azad, Dr Rajendra Prasad etc. Gandhi ji adopted a policy of Ahimsa and non co operation against the British.
- Salt Satyagraha, Quit India Movement etc were the path of these policies.
- In the end, after the sacrifice of countless lives, India gained freedom on 15 August, 1947.
- We won this freedom after a hard struggle and the sacrifice of countless lives. We should protect this freedom with our lives.

Exercise

I. In the sentences given below put a (✓) on the correct and a (✗) on the incorrect sentences:

i. The revolt of 1857 was the first fight against the British. ( )

ii. The Indian National Congress was founded by Dadabhai Naoroji. ( )

iii. Mangal Pandey refused to use greased cartridges. ( )

iv. In the struggle for independence revolutionaries had no role to play. ( )

v. India became independent on 26 January, 1947. ( )

II. Match the following:

i.	Jhansi	1885
ii.	Congress	Meerut Cantonement
iii.	Mangal Pandey	Amritsar
iv.	Jallianwala Bagh	15 August 1947
v.	Independence Day	Rani Laxmibai

III. Fill the blanks:

i. In ancient times India was known as the ..... .

ii. After Aurangzeb died in the year ..... the condition of the Mughal empire became unstable.

iii. Gandhi ji adopted the path of ahimsa and ..... against the British.

iv. An Englishman named ..... - founded the congress.

v. Azad Hind Fauj ..... .

IV. Why were the British scared of Haider Ali?

_____

V. Why was the Congress founded?

_____

VI. Who was the first person to come to India from Portugal?

_____

VII. What were the Indian goods that were traded in European nations?

_____

VIII. Write five sentences about Gandhi ji's contribution in the freedom struggle.

_____

_____

_____

_____

_____

IX. Who were the leaders who supported Gandji in getting independence for India? Name four such leaders.

_____

_____

X. When did we gain freedom from British rule?

_____

_____

ANSWERS

Let's see, what you have learnt

4.1 i. correct ii. incorrect

iii. incorrect iv. correct

v. correct

4.2 i. important ii. cartridges

iii. Bahadur Shah Zafar iv. Victoria

4.3 i. 1857 ii. 1929

iii. Mangal Pandey iv. Subhash Chandra Bose

Exercise

I. i. correct ii. incorrect

iii. correct iv. incorrect

v. incorrect

II. i. Rani Laxmibai ii. 1885

iii. Meerut Cantonement iv. Amritsar

v. 15, August 1947

III. i. Golden bird ii. 1707

iii. Non Co operation iv. A.O.Hume

v. Britishers

5

The States of India and their Physical features

We will learn in this lesson

- Introduction to the states and Union territories of India
- To identify states and Union territories on a map
- Location of India on a world map
- The physical features and natural resources of India
- Climate, major crops and vegetation of India

India is a vast country. In terms of area it is the seventh largest country of the world. Geographically India lies in the continent of Asia. To its north are Nepal, China and Bhutan. To its East are Bangladesh and Myanmar(Burma). Pakistan and Afghanistan are to the West. India is surrounded on three sides by Ocean. In the east is the Bay of Bengal, in the west the Arabian Sea and in the south is the Indian Ocean. The three seas meet in Tamilnadu's Kanyakumari. India has two groups of islands" Andaman and Nicobar islands in the Bay of Bengal and Lakshadweep islands in the Arabian Sea. From north to south the length of India is 3214 kms and from east to west its width is 2933 kms. Its total area is 32.4 lakh kilometers.

5.1 The states and union territories of India and their introduction

At one time India had many small states. The Britishers were able to rule our country for a long

time because of the disputes amongst the rulers of these states. India became free on 15 August, 1947 and Delhi was made its capital. At that time 600 princely states were consolidated. For reasons of good administration India was divided into 29 states and 7 union territories. The names of these states and their capitals are given below.

States

State	Capital	State	Capital
Andhra Pradesh	Hyderabad	Assam	Dispur
Arunachal Pradesh	Itanagar	Bihar	Patna
Goa	Panaji	Chhattisgarh	Raipur
Gujarat	Gandhinagar	Haryana	Chandigarh
Himachal Pradesh	Shimla	Jammu and Kashmir	Srinagar
Jharkhand	Ranchi	Karnataka	Bengaluru
Kerala	Thiruvananthapuram	Maharashtra	Mumbai
Madhya Pradesh	Bhopal	Meghalaya	Shillong
Manipur	Imphal	Mizoram	Aizawl
Nagaland	Kohima	Odisha	Bhubaneswar
Punjab	Chandigarh	Rajasthan	Jaipur
Sikkim	Gangtok	Tamil Nadu	Chennai
Tripura	Agartala	Uttar Pradesh	Lucknow
Uttarakhand	Dehradun	West Bengal	Kolkata
Telangana	Hyderabad		

Political map of India

Union Territories

Union Territory	Capital
Andaman and Nicobar Islands	Port Blair
Chandigarh	Chandigarh
Dadra and Nagar Haveli	Silvassa
Daman and Diu	Daman
Delhi	Delhi
Lakshadweep Islands	Kavaratti
Puducherry	Puducherry

Let's see, what you have learnt 5.1

I. Answer the following questions:

i. Which countries lie to the north of India?

_____

ii. Which are the three seas bordering India?

_____

iii. Where and in which state do the three seas meet?

_____

iv. How many states and union territories are there in India?

_____

v. What is the capital of India?

_____

II. Fill in the blanks:

i. To the north of India are ..... and .....

ii. The capital of Madhya Pradesh is .....

iii. The capital of Manipur is .....

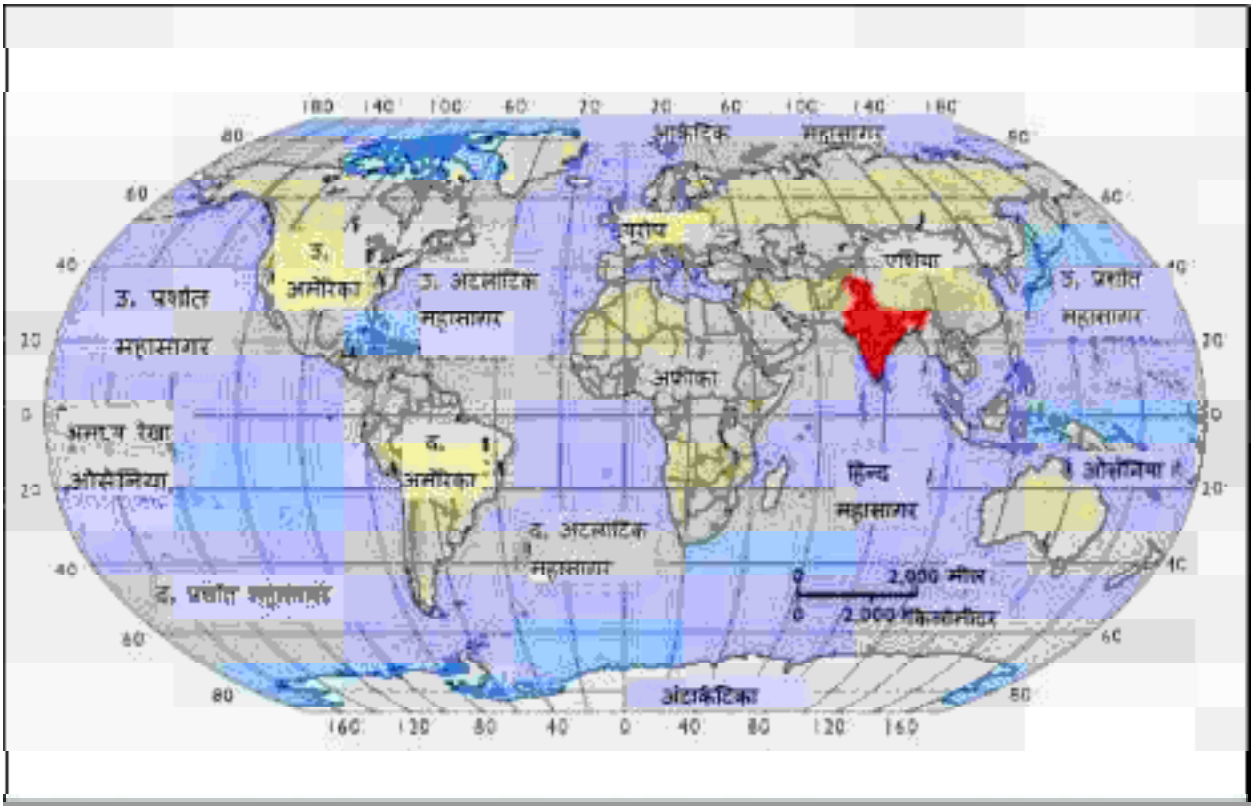

iv. Lakshadweep is near the state of .....

v. The total area of India is ..... lakh kilometers.

5.2 The location of India in the political map of the world

Look at the globe carefully. In the centre of the globe there is a line drawn from east to west. This is the equator. This line goes exactly through the middle of the earth. Therefore it is called the equator. If the globe was divided using this line then it would get cut into two equal parts. The upper part is the Northern Hemisphere and the lower is the Southern Hemisphere. To the north and south of the equator one line each has been drawn at equal distance. The line to the north of the equator is the Tropic of Cancer and the line to the south is the Tropic of Capricorn.

The vertical and horizontal lines forming a type of grid on the globe are made by lines of latitude and longitude. The horizontal lines on the globe and map are the Lines of Latitude. The vertical lines are called the Lines of Longitude. All these lines are imaginary. With the help of these lines it is easy to locate places. For example if someone were to ask where North America is located the reply would be that it is to the north of the Tropic of Cancer or it is on this line of Latitude on that Line of Longitude. If someone asks where India is located the reply would be it is to the north of the equator. The Tropic of Cancer passes through the middle of India.

If we started walking to the north of the equator and kept walking then one day we would reach the northern end of the world. This part of the earth is called the North Pole.

Similarly if we walked from the south of the equator and kept walking then one day we would reach the extreme southern end. This is known as the South Pole.

India is located in the northern hemisphere.

The Himalaya Mountains are to the north of India, Indian Ocean is to its south, Bay of Bengal to its east and Arabian Sea to its west.

Let's see, what you have learnt 5.2

Fill in the blanks:

i. On the globe ..... is drawn in the middle from east to west.

ii. The part to the north of the equator is called .....

iii. ..... passes in n the middle of India.

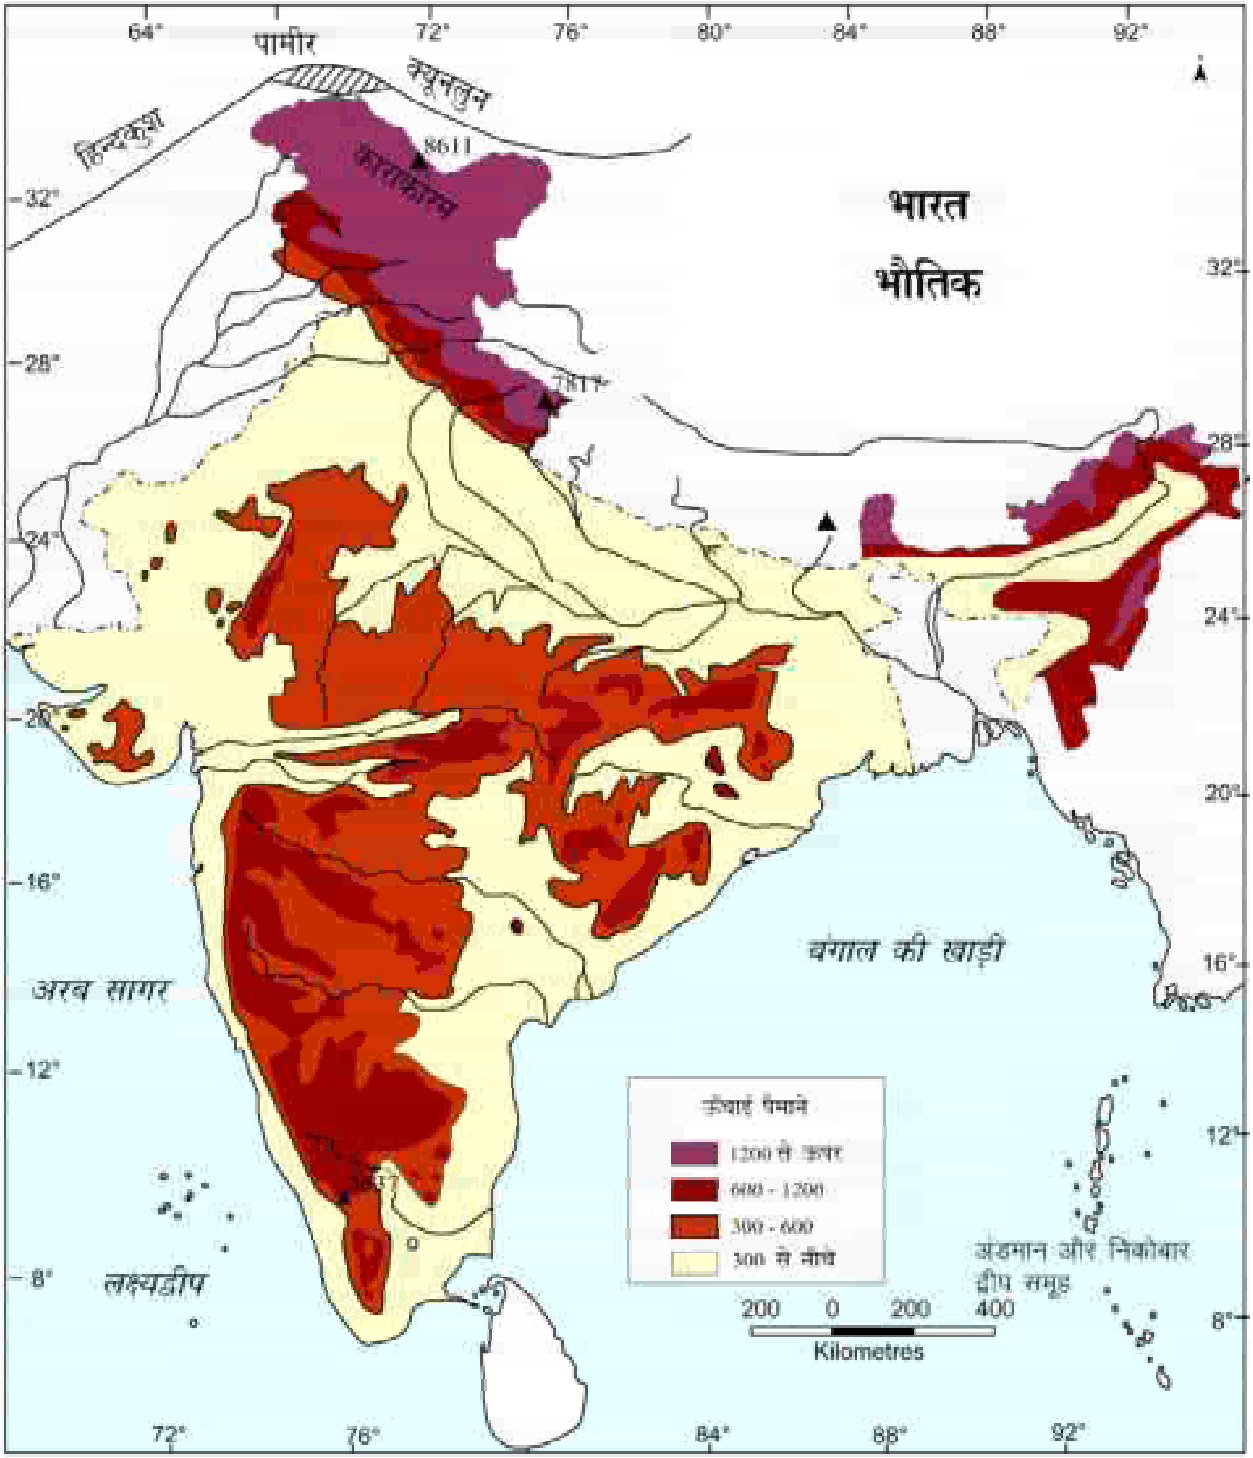

iv. The northern end is called the ..... and the southern end is called the .....

v. To the north of India are the .....

5.3 The Physical features and resources of India

India is a vast country. It has the highty Himalayas, the Northern Plains, the Thar Desert, Coastal Plains, and the Deccan Plateau in the south. Because of the difference in climate the wildlife, flora-fauna, fruits-vegetables are different at different places. The physical features of India can be grouped under the following 6 divisions:

1. The Northern Mountains
2. The Northern (Indo Gangetic) Plains
3. The Peninsular Plateau
4. The Indian (Thar) Desert
5. The Coastal Plains
6. The Islands

Physical map of India

5.3.1 The Northern Mountains

To the north of India is the Himalaya Mountain. This is spread from Kashmir in the north-west to Arunachal Pradesh in the east. Its average height is 6000 meters and width is from 120 kilometer to 190 kilometer. The Himalayas are also called the watchman of India. It is so tall that it is difficult to cross it. At places its snow covered peaks are covered with snow throughout the year. The world's highest mountain peak, Mount Everest, is in the Himalayas and is in Nepal. The height of this peak is 8848 meters. The other high peaks of the Himalayas are - Kanchenjunga, Makalu, Dhaulagiri, Nanga Parbat etc and their height is also more than 8000 meters.

Shipki La, Nathu La, Bom Di La, etc are some of the difficult and inaccessible Passes of the Himalayas. Shimla, Kulu, Manali, Kangra, Mussourie, Dehradun, Almora,Nainital, Ranikhet, Darjeeling, Dalhousie, Chakrata, Srinagar, Gangtok etc are some beautiful hill stations in the Himalayas. Jhelum, Ravi, Satluj, Beas, Ganga, Yamuna, Ghagra, Gandaki, Kosi and Bhramaputra are some rivers originating from here.

Houses in the mountains are situated far apart. Step farming is practised here because of the slopes.

5.3.2 The vast Northern Plains

The plains are made from the soil of the Indus, Ganga and Brahmaputra rivers. From Punjab in the west to Assam in the east the length of the Plains is about 2400 kilometers. Its width in the east is about 150 kilometers and in the west is about 300 kilometers. These plains are one of the most fertile plains in the world. Wheat, rice, corn, sugarcane, pulses, oilseeds and jute are grown here. The Plains are divided into two parts. One part is formed by the rivers Sutlej, Beas and Ravi. The other is formed by the soil brought by the Brahmaputra and Ganga rivers. Ancient civilizations such as Mohan-jo-Daro and Harappa took birth and developed here .

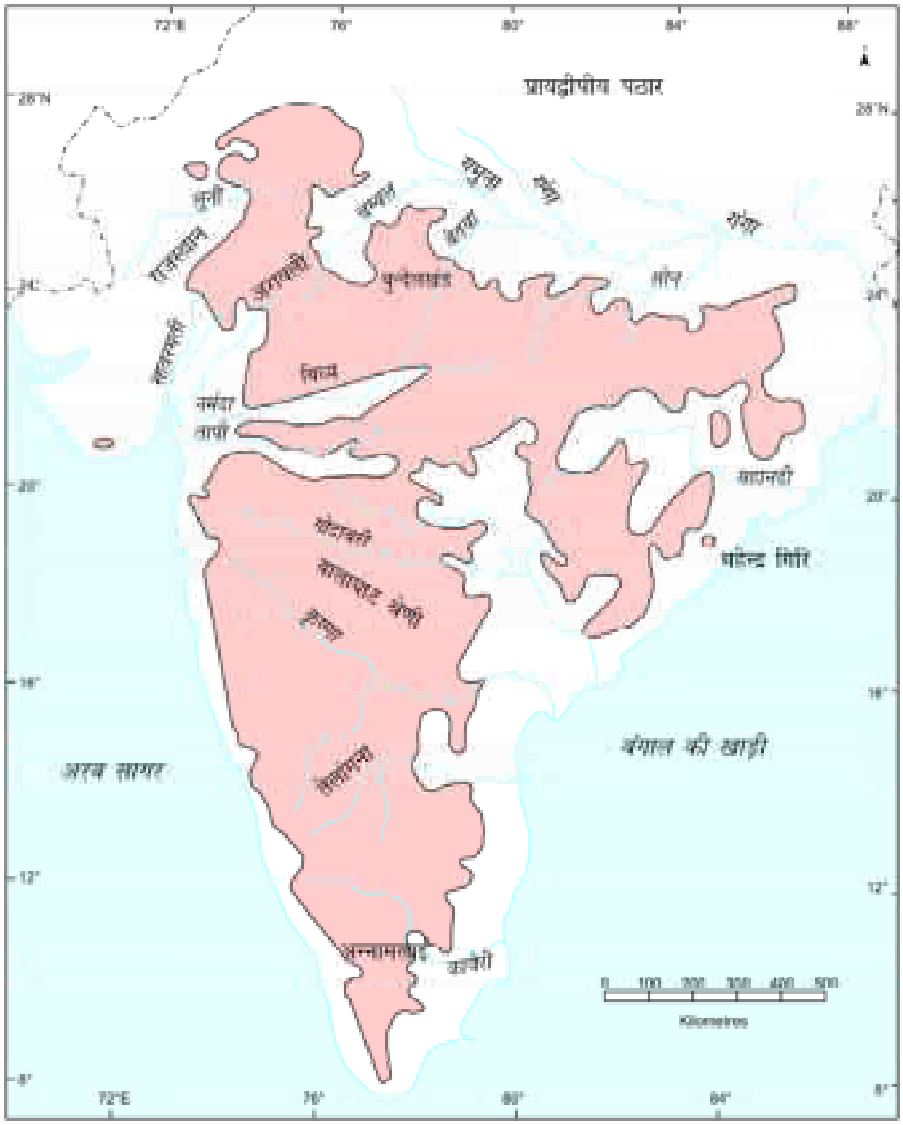

Map of Rivers of India

5.3.3 The Peninsular Plateau

This is spread across the states of Gujarat, Maharashtra, Bihar, Karnataka and Andhra Pradesh. This is called the Gondwana Land. It forms a raised triangle. The Peninsular Plateau has two parts- The Central HighLands and the Deccan Plateau.

a. Central Highlands: This land lies in the center of plains north of the Narmada River. Aravalli is an important mountain which is spread from Gujarat to Rajasthan and to Delhi. The highest peak of Aravalli is Guru Shikhar and is near Mount Abu. Malwa Plateau and Chotanagpur Plateau are a part of the Central Highlands. Betwa, Chambal and Ken are the important rivers of the Malwa Plateau. Mahadev, Kaimur and Maikal are the important hills of this plateau. Narmada Valley is situated between the Vindhya and the Satpura ranges. The Narmada River flows from east to west to fall into the Arabian Sea.

b. **Deccan Plateau:** This was formed after a volcanic eruption. The soil here is black. Cotton and sugarcane crops grow well here. It is divided into two parts- 1. Western Ghats 2. Eastern Ghats.

5.3.4 Western Ghats

Western Ghats: This is a mountain range that runs parallel to the western coast of India. The famous peaks of this area are Doddabetta, Anaimudi, Mukurthi. These are crossed from the Pal Ghat, Thal Ghat, Bhor Ghat passes. Godavari, Bhima and Krishna rivers flow to the east while the tapti river flows to the west.

Eastern Ghats: These ghats are on the eastern coast of India. They run parallel to the Bay of Bengal and are spread till the Nilgiri mountains. The highest peak is Mahendragiri. Its famous hills are- Mahendragiri and Namaigiri in Odisha, Kollimalai, Pachaimalai in Tamil Nadu and Nallamalai in South Andhra Pradesh. Godavari, Krishna and Cauvery rivers flow here.

5.3.5 Thar Desert

This is situated to the west of the Arravali Mountains. It is the ninth biggest desert of the world. Thorny bushes are found here. Luni is the main river of this region. It is seen only in the rainy season. In other months it disappears in the sand.

5.3.6 Coastal Plains

The coastal plains of India are located along the Arabian Sea coast in the west and along the Bay of Bengal coast in the east equi-distant from the Deccan Plateau. The plains are 10-20 kilometers wide. Western Coastal Plains have three parts- a. Konkan Coast (From Mumbai to Goa) b. Karnataka Coast (From Goa to Mangalore) c. Malabar Coast(From Mangalore to Kanyakumari). The Eastern Coastal Plains are along the Bay of Bengal. Their average width is 120 kilometers. Its northern part is called Northern Circar and southern part is called the Coromandal Coast. The Eastern Coastal Plains are a delta formed by the Mahanadi, Godavri, Krishna and Cauvery rivers. Rice, coconut and black pepper are grown here. Fishing is a major occupation of this region and is a flourishing trade.

5.3.7 The Islands

India has two groups of islands. In the Bay of Bengal are the Andaman and Nicobar islands made up of 204 islands. Lakshadweep Islands in the Arabian Sea are a group of 43 islands. Lakshadweep is near the Malabar Coast of Kerala and is in the Arabian Sea. It is spread in an area of 32 square

kilometers. Its capital is Kavaratti. Many types of plants and animals are found here. Andaman and Nicobar group of islands from north to south are in the Bay of Bengal. They are bigger in shape. This region attracts many tourists.

5.4 Climate

The weather conditions, its patterns and variation in temperature prevailing in a big area over a long period (30 years or more) is called climate. Weather is the state of the atmosphere at any particular period of time. In India some places are very hot while at the same time others are very cold. The climate is different at different places. In summers people go to hill stations such as Darjeeling, Kulu, Ooty etc to escape the heat of the plains. There are many reasons for this.

5.4.1 Location

India is located in the northern hemisphere 8 °4"north of the Equator. The ray's of the sun fall directly here and so it is very hot in our country. The Tropic of Cancer also passes right through the middle of India at 23 1/2° north. Therefore, the areas close to this have normal to mild hot climate. For example the climate of Andhra Pradesh is hotter than that of Haryana.

5.4.2 Distance from the Sea

The southern part of India is surrounded by seas on three sides. Arabian Sea is to its west, Bay of Bengal to the east, and Indian Ocean to the south. Because of the sea the areas close to the coast are neither too hot nor too cold. The climate in coastal towns such as Chennai, Kolkata, Mumbai, Thiruvananthapuram, Kanyakumari etc is humid. On the other hand cities in north India such as Delhi, Patna, Bhopal, Jaipur etc are very hot in summer and very cold in winters.

5.4.3 Height from sea level

As we go up higher from the surface of the earth the weather becomes cooler. It also becomes difficult to breathe.Places higher up from sea level experience cold climate. So much so that thePlaces such as Shimla, Kulu, Gangtok, Darjeeling etc experience snow too.

5.4.4 Mountain Ranges

The average height to the north-east of the Himalaya Mountain is 6000 meters. Therefore it is able to block the monsoon coming from the Bay of Bengal and the Arabian sea which leads to the plains experiencing good rainfall. The Himalayas also protect us from the cold winds blowing from Central Asia. Wherever there are mountains there is good rainfall, for example Western Ghats.

5.4.5 Direction of Surface Winds

In winters the wind moving from land to sea is cold and dry. On the other hand in summers the wind moves from the sea to the land The wind brings with it moisture from the sea and so most of the country experiences rainfall.

5.4.6 Our Wind Currents

Some winds blow at a height of 12000 meters. These winds pass near the Mediterranean Sea to reach here. These are also called cyclonic winds. These winds collect moisture from the Persian Gulf to bring rain to the western parts of Northern India during winter. These are also called Jet winds. These winds shift to the north in summer.

Let's see, what you have learnt 5.3

I. Fill in the blanks:

i. World's highest peak is .....

ii. The vast plains of North India have been made by the rivers Indus, Ganges and ..... .

iii. The Peninsular plateau on ..... shape is on raised land.

iv. The Deccan Plateau was formed by the ..... explosion.

v. The Thar Desert is the world's biggest .....

II. Write the answers:

i. Names of any two high peaks

a. _____ b. _____

ii. The names of any three places of tourist interest in the Himalayas.

a. _____

b. _____

c. _____

iii. The names of any two rivers of the Peninsular Plateau.

a. _____ b. _____

iv. The capital of Lakshadweep

_____

v. Write the names of any two places where people go on tour during summers

a. _____ b. _____

vi. The names of any two cities near the coast.

a. _____ b. _____

5.5 Major Crops and Vegetation

5.5.1 Crops

India is an agriculture based country. 70% of the population is dependent on agriculture. Different kinds of soils are found in different parts of our country. The climate is also different at different places. The Himalaya mountain range is spread from Jammu Kashmir to Arunachal Pradesh. The Western Ghats and the Eastern Ghats are also in the form of mountain ranges. This is the reason why different crops are grown at different places.

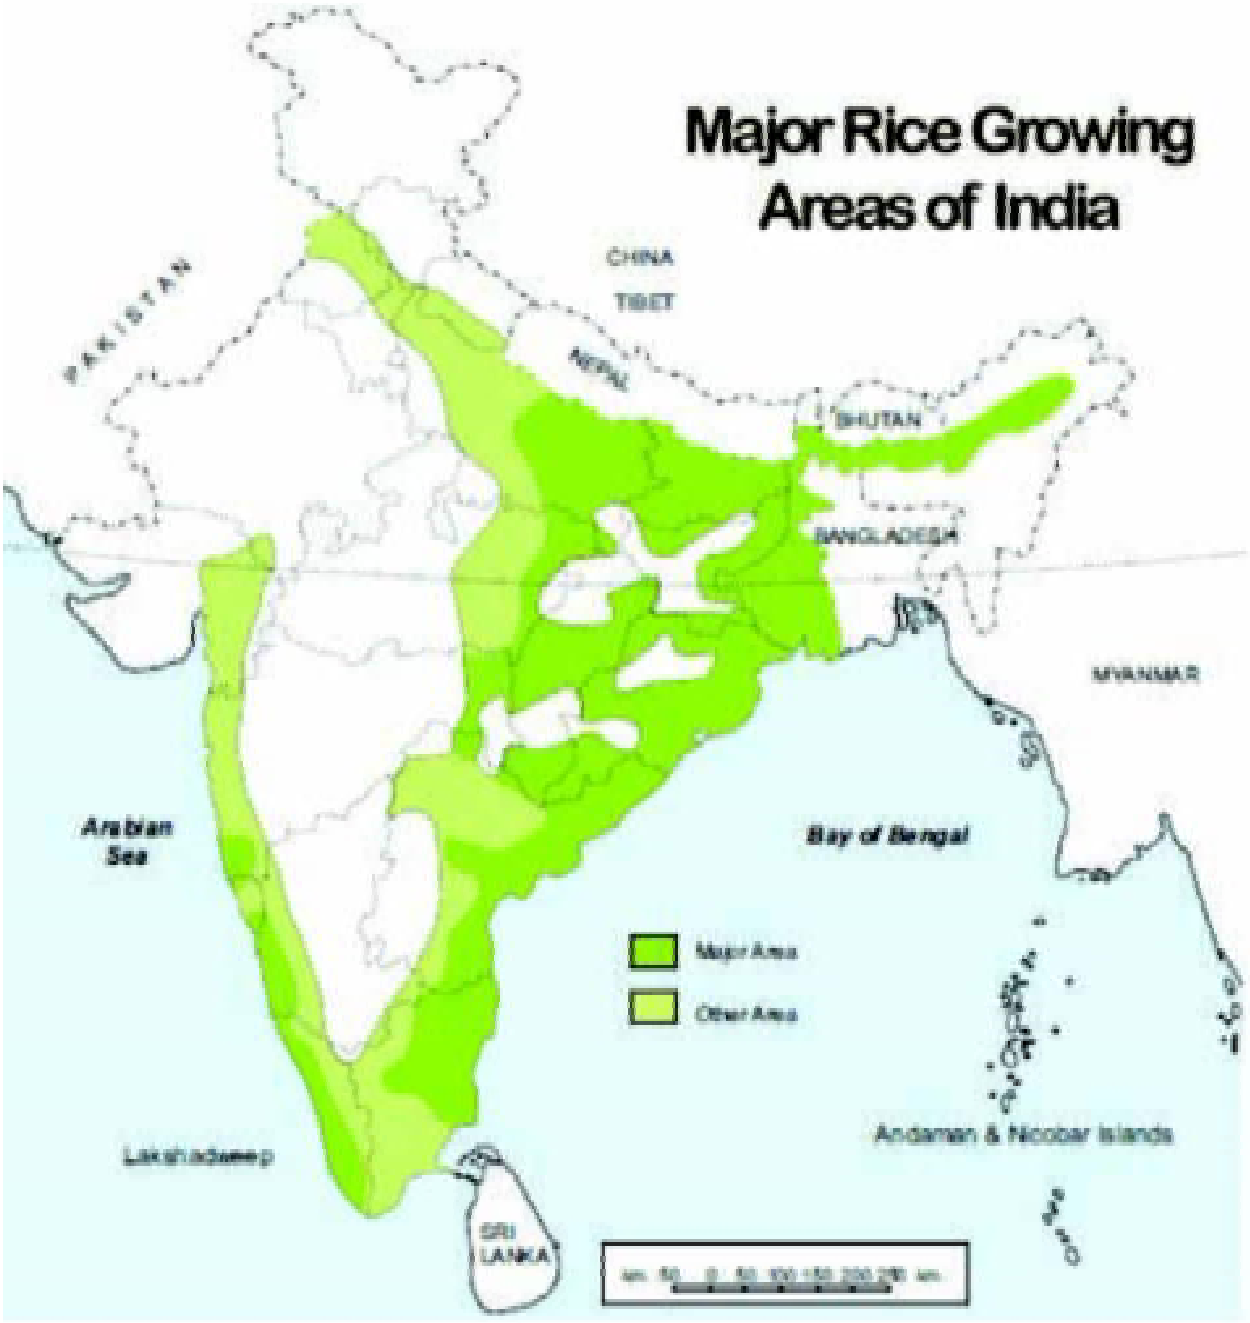

India's Indo-Gangetic Plain is one of the biggest plains in the world. In the middle part is the plateau area. There has been a huge advancement in seeds, tools and plant medicines leading to high quality farming. Different crops are grown in India. The main crops are rice, wheat, millets, pulses, cotton, oilseeds, tea, coffee, jute etc.

1. Food Crops - rice, wheat, corn, millet and pulses
2. Cash Crops - cotton, jute, sugarcane, tobacco and oilseeds
3. Plantation - tea, coffee, coconut and rubber
4. Horticulture Crops - fruits and vegetables

1. Food Crops:

(i) Rice: Rice is an important crop of India. It is a kharif crop of summer. It forms one-third part of the country's total farming land. It is the staple food of more than half of India's population.

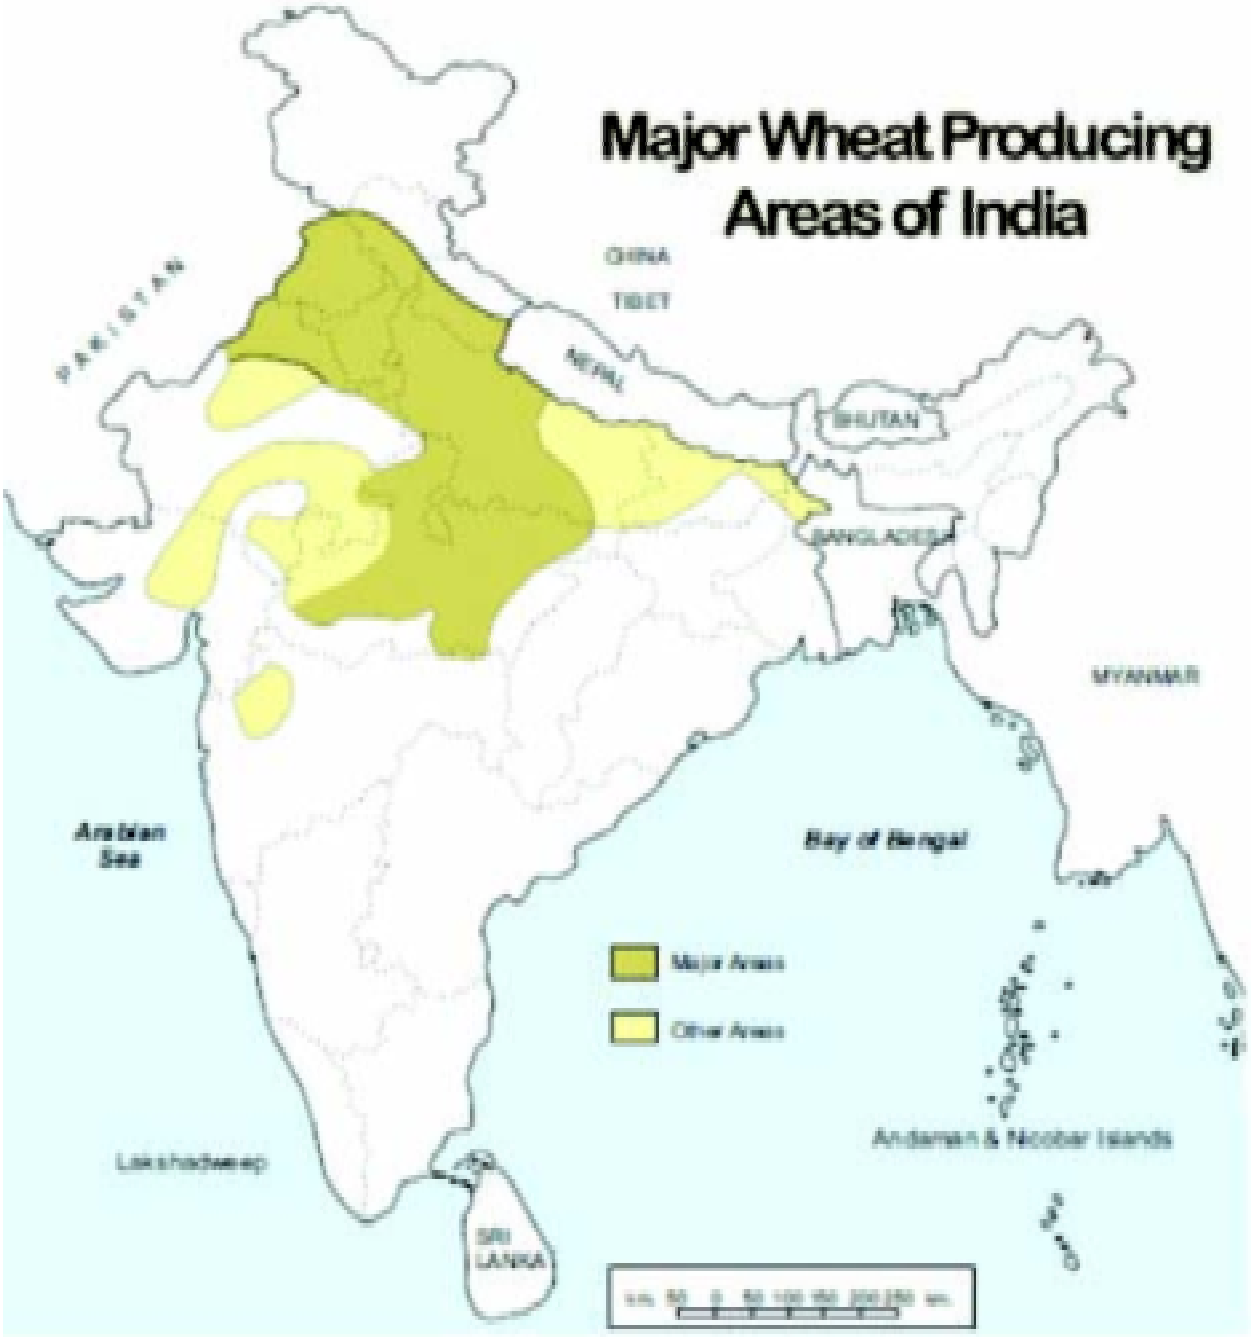

Rice needs an average temperature of 24°celsius. Since it needs a lot of water so rainfall of 150 to 300 c.m is needed. It is also grown in states like Punjab. Haryana and Western Uttar Pradesh where rainfall is less than 100 cm. It needs a clayey and loamy soil.

Map of area where rice is grown

Rice is grown more in West Bengal, Jharkhand, Uttarakhand, Uttar Pradesh, Andhra Pradesh, Punjab, Tamil Nadu, Bihar, Chhattisgarh, Odisha, Assam, Karnataka, Maharashtra. The straw of rice is used as fodder while its husk is used in brick kilns to bake bricks.

(ii) **Wheat:** Wheat is the second most important foodgrain. This is a rabi or winter crop. It needs an ideal temperature of 10-15 degrees Celsius at sowing time and 21-26 degrees Celsius at the time of ripening. Wheat crop needs rainfall of 100 cm. It grows well in loamy and clay soil. It is grown more in Uttar Pradesh, Punjab, Haryana, Madhya Pradesh. After removing the grains the straw is used as fodder.

Map of wheat growing area

(iii) Oats and Millets: This is a crop of short summer duration. It is used as food as well as fodder. This is a kharif crop. It needs a temperature of 27-32 degrees Celsius and rainfall of 50-100 cms. This is grown in sandy and shallow black soil. It is grown mostly in Madhya Pradesh, Gujarat, Rajasthan, Maharashtra, Karnataka, Tamil Nadu, Andhra Pradesh, Haryana and Punjab.

(iv) Pulses: The pulses grown in India are Toor, Arahar, Masoor, Black grains, Moong, beans, Matar, Rajma etc . Pulses are grown mainly in the states of Madhya Pradesh, Uttar Pradesh Maharashtra, Rajasthan, Haryana, Uttarakhand and Maharashtra.

2. **Cash Crops:** These are mainly sugar cane, cotton, jute, tea, coffee, oilseeds, peanuts, mustard, rapeseed, coconut etc.

5.5.2 Vegetation

Vegetation and forest life are valuable resources. We get wood from forests as well as shelter for humans and animals.Trees produce oxygen which helps us to breathe. Trees protect us from natural disasters such as floods, strong winds etc. Trees are used in the making of turpentine oil, gum, medicines, paper etc. The following forests are found in India:

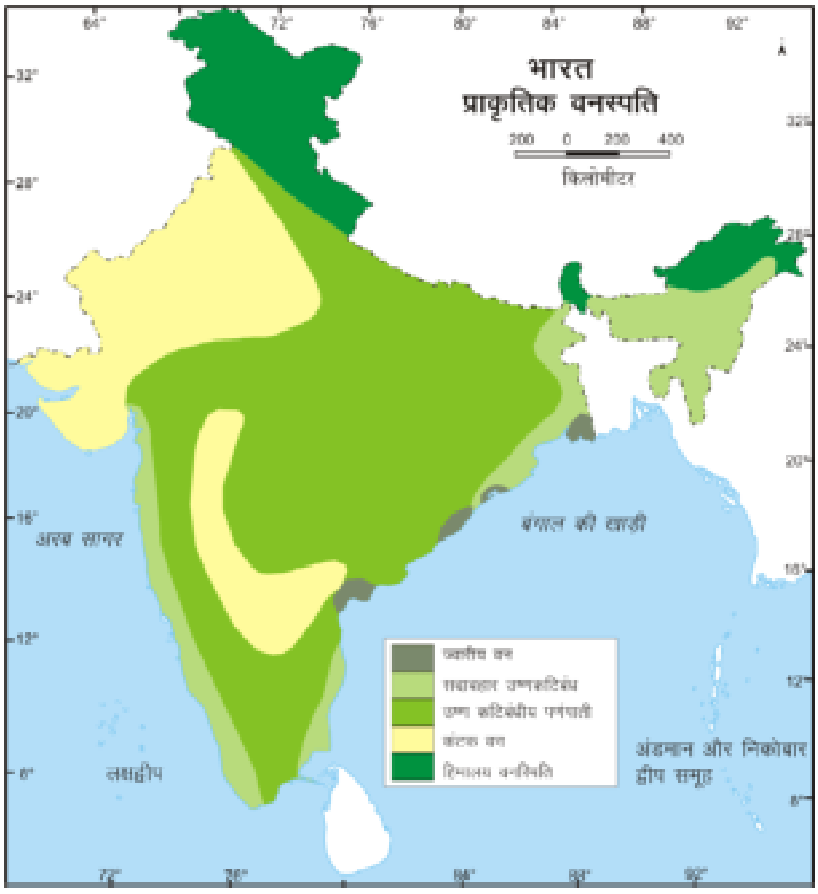

(1) Evergreen Forests

(2) Deciduous Forests

(3) Thorn Forests

(4) Mangrove Forests

(5) Himalayan Forests

1. **Evergreen Forests:** These trees do not shed their leaves in any particular season and so they are called Evergreen forests. The trees of these forests stay green because of moist and warm climate. These trees are found in places which receive 200 cms or more of Deciduous rainfall. The height of the trees can go up to 60 meters or even more. Ferns, trees creepers, climbers, bushes etc grow in these forests. Scented wood, ebony, mahogany, rubber, bamboo etc are found in these forests. These forests are found in the Western Ghats, Lakshadweep, Andaman & Nicobar Islands, and upper parts of Assam.

2. **Deciduous Forests:** This type of forests is found in areas receiving 75 to 200 cms of rainfall. The trees of these forests shed their leaves once a year. This is why they are known as deciduous forests. Except the Deccan Plateau, North-East region, Western Ghats, Eastern Ghats these forests are found in the rest of India. These forests are of two types:

   (i) **Moist Deciduous Forests:** These are found in areas which get 100-200 cms of rainfall. These forests have ebony, bamboo, teak, sheesham, chandan, khair, arjun, Mahua, Jamun, mulberry etc trees. These forests are found in the eastern parts of the country, foothills of the Himalayas, Jharkhand, Odisha, Chattisgarh and Western Ghats.

   (ii) **Dry Deciduous Forests:** These forests are found in areas which get 75-100 cms of rainfall. Ebony, teak, peepal and neem trees grow in these forests. These are found in Uttar Pradesh, Deccan Plateau, Madhya Pradesh and Bihar.

3. **Thorn Forests:** These forests are found in areas receiving less than 75 cms of rainfall. The states where these forests are found are western India, Gujrat, Rajasthan, Madhya Pradesh, Chattisgarh, Uttar Pradesh, Haryana, Karnataka, Andhra Pradesh, Maharashtra. Babool, acacia, cactus, khair, palm and date trees grow in these forests.

4. **Mangrove Forests:** These forests are found in places where silt and water collects on the ground. The roots and branches of these trees and plants are mostly immersed in water. They are also called mangrove Forests. These trees have thick leaves and are evergreen. Sunder bans, the deltas of rivers Mahanadi, Godavari, Krishna, Cauvery and islands Andaman & Nicobar are the places where these forests are found. Palm, coconut, keora, anar trees grow in these forests.

5. **Himalayan Forests:** These are mainly found in the hilly regions of the Himalayas. Sal and bamboo trees are found in these forests. Oak, chest, pine etc trees with broad leaves are found growing at a height of 1000 to 2000 meters. The tress which grow 1500-3000 meters the trees which grow are oak, pine chestnut, deodar, cedar, silver, spruce etc. Birch, silver, deodar trees are found at a height of 3000-3800 meters.

Let's see, what you have learnt 5.4

Fill in the blanks:

i. Rice grows in ..... and ..... soil.

ii. Wheat is a ..... criop.

iii. Bajra is a short duration crop of ..... season.

iv. The oxygen we get from vegetation helps us to .....

v. Thorn forests are found in areas of less .....

Let's Revise

- Nepal, China and Bhutan are to the North of India.
- Bangladesh and Mynmar are in the East
- Pakistan is in the West.
- India is surrounded by oceans on three sides. The Bay of Bengal, Arabian Sea and the Indian Ocean are near it.
- In the Bay of Bengal are the Andaman and Nicobar and in the Arabian Sea, near Kerala are the Lakshwadeep islands.
- India's total area is 32.8 Lakh square Kilometers.
- The length from North to South is 3214 Kilometers and the breadth from East to West is 2933 Kilometers.
- When India became independent, 600 princely states were integrated into it.
- India has been divided into 29 states and 7 Union Territories.
- Lines drawn from East to West are called Latitude lines and those drawn from North to South are called Longitude lines.
- The Tropic of Cancer at 23½ degrees North divides india into two almost equal parts.
- According to the natural features India has been divided into 6 parts.
  - (i) Mountainous region in North
  - (ii) Large plains of North India

(iii) Southern Plateau

(iv) Thar desert

(v) Coastal plains

(vi) Island group

- The Himalayas are spread from Kashmir in northern India to Arunachal Pradesh.
- This is also called the watchman of our country.
- The tallest mountain peak in the world, Mount Everest (8848 meters) is in the Himalayas.
- Mountain peaks of over 8000 metres height like Kanchenjunga, Makalu, Dhaulagiri, Nanga Parbat are there in the Himalayas.
- These mountain peaks are covered with snow throughout the year.
- Mountain passes like Baralacha-La, Nathu-La, Bomdi-La, Shipki-La are also present in the Himalayas.
- Some beautiful spots like Shimla, Kullu, Manali, Kangra, Mussourie, Dehradun, Darjeeling, Dalhousie, Chakrata, Srinagar etc. are also there.
- Rivers coming out of the Himalayas are Jhelum, Ravi, Satluj, Ganges, Yamuna, Gomti, Ghaghra, Gandak, Kosi, Brahmaputra etc.
- The vast plains of the North are the plains of Ganges, Sindhu and Brahmaputra. These are one of the most fertile plains in the world.
- The peninsular plateau is also called Gondwana Land.
- The peninsular plateau is spread over Gujarat, Maharashtra, Bihar, Karnataka and Andhra Pradesh, Tamil Nadu.
- The two parts of the peninsular plateau are Central Highlands and Deccan Plateau.
- The central Highlands are spread over Malwa Plateau and Chota Nagpur Plateau.
- The Aravali Mountains extend from Gujarat, Rajasthan upto Delhi.
- The Deccan Plateau has been formed by a volcanic eruption.
- The Deccan Plateau is located between the Eastern and Western Ghats.
- Its main mountain ranges are Doda Bel, Anaimudi and Makurti.
- It has Palghat, Thalghat and Bhorghat passes.

- Rivers Godavari, Bheema and Krishna flow to the East and Narmada and Tapti flows to the West.
- The Thar Desert is located towards the western corner of the Aravali Mountains. Luni is the main river of this region.
- The East coast which is 10-20 Kilometres wide runs parallel to the Bay of Bengal next to the Deccan Plateau.
- The average width of the West Coast is 120 Kilometres. Rice, coconut and black pepper are grown here.
- In the Bay of Bengal is the Andaman and Nicobar group of islands comprising of 204 islands.
- In the Arabian Sea is the Lakswadeep group of islands comprising of 43 islands.
- The capital of Lakswadeep is Kavaratti.
- Our climate is affected by location, distance from the sea, height from sea level, mountain ranges, wind direction and speed.
- In India, food crops like rice, wheat, maize, millet, pulses are widely grown.
- Cash crops like cotton, jute, sugarcane, tobacco and oilseeds are also grown.
- Plantation crops like tea, coffee, coconut and rubber are grown.
- Horticulture crops like fruits and vegetables are grown.
- In India Evergreen forests, Deciduous forests, Thorn forests, Mangrove forests and Himalayan forests are found.
- In Evergreen forests teak,mahagony, rubber, jack wood is found. These trees grow in areas getting rainfall of more than 200 cms.
- Deciduous forests are found in areas getting rainfall between 75 cms to 200 cms. These have trees of teak, bamboo, sal, sheesham, chandan, khair, mahua, kusum, arjun, jamun, mulberry.
- Thorn forests are found in areas getting less than 75 cmc of rainfall. In these babool, acacia, khair, cactus, date etc trees are found.
- Mangrove forests are found in Sunderbans and the deltas of rivers Mahanadi, Godavari, Krishna and Kaveri.
- In the Himalayan forests oak, chestnut, deodar, cedar, silver etc trees are found.

Exercise

I. Fill in the blanks:

i. Taking moisture from the Persian Gulf rainfall occurs in the northern parts of ..... in winters.

ii. As one goes higher from ground level it gets .....

iii. On the Equator ..... rays of the Sun's fall .

iv. In the mountains there is ..... rainfall.

v. Rice is grown in a ..... area of total agriculture.

II. Match the following:

i.	Jammu- Kashmir	a.	Mumbai
ii.	Karnataka	b.	Panaji
iii.	Goa	c.	Imphal
iv.	Maharashtra	d.	Srinagar
v.	Assam	e.	Shillong
vi.	Manipur	f.	Bengaluru
vii.	Meghalaya	g.	Dispur
viii.	Gujarat	h.	Hyderabad
ix.	Andhra Pradesh	i.	Ranchi
x.	Jharkhand	j.	Gandhi Nagar

III. Tick the correct answer:

i. To the north of India is:

a. Pakistan b. Myanmar

c. Bangladesh d. Nepal

ii. The capital of Chattisgarh is:

a. Bhopal b. Raipur

c. Ranchi d. Patna

iii. The highest peak of the Himalayas is:

a. Kanchanjunga b. Mt. Everest

c. Makalu d. Dhaulagiri

iv. Thar Desert has:

a. Thorny bushes b. Neem trees

c. pine d. Deodar trees

v. Deciduous forests have:

a. Bamboo trees b. Teak

c. Date trees d. Deodar trees

IV. Write the answers of the following:

i. Name two trees of the Himalayan vegetation.

a. _____ b. _____

ii. Name two trees of the mangrove forests.

a. _____ b. _____

iii. Name two trees of the deciduous forests.

a. _____ b. _____

iv. Name two cash crops

a. _____ b. _____

v. Write the names of two plantations crops.

a. _____ b. _____

vi. Write the names of two coastal rivers

a. _____ b. _____

vii. Write the names of two important rivers of the Malwa Plateau

a. _____ b. _____

viii. The names of any two rivers of the Northern Plains

a. _____ b. _____

ix. Name two Himalayan passes

a. _____ b. _____

x. Name two hill stations in the Himalayas

a. _____ b. _____

xi. Which city is the capital of two states?

a. _____ b. _____

xii. Name two seas bordering India.

a. _____ b. _____

xiii. Which line passes through the middle of India

a. _____

xiv. Name two places where people go for holidays in summers.

a. _____ b. _____

xv. Name two states where Jowar-Bajra is grown.

a. _____ b. _____

ANSWERS

Come, let's see what you have learnt

5.1 I. i. Nepal, China, Tibet, Bhutan ii. Bay of Bengal, Indian Ocean, Arabian Sea

iii. TamilNadu iv. 28 states, 7 Union territories

v. Delhi

II. i. Pakistan and Afghanistan ii. Bhopal

iii. Imphal iv. Kerala

v. 328
