DEEPKIDS

GAMES THAT DELIVER CONCEPTS ACROSS SUBJECTS

First Principles

Free Thinking

Fun

ENTERTAINMENT FOR KIDS TODAY!

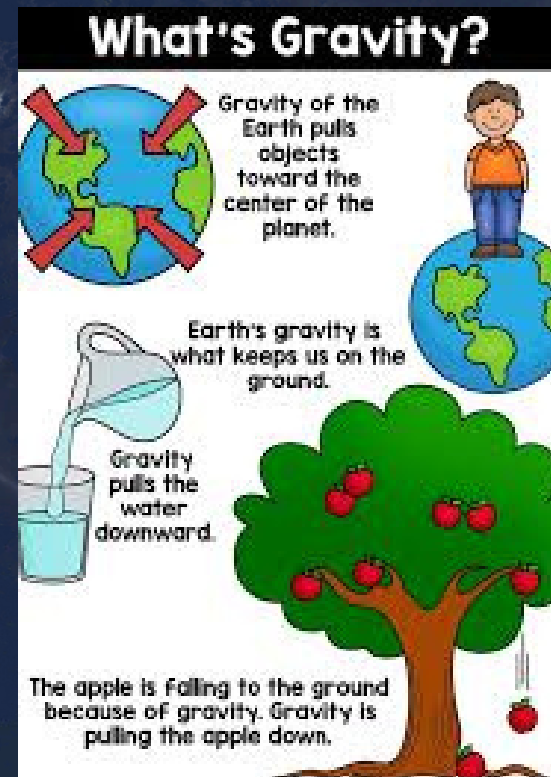

Doom Scrolling
Garbage Content
Addictive , Destructive, Mind Numbing

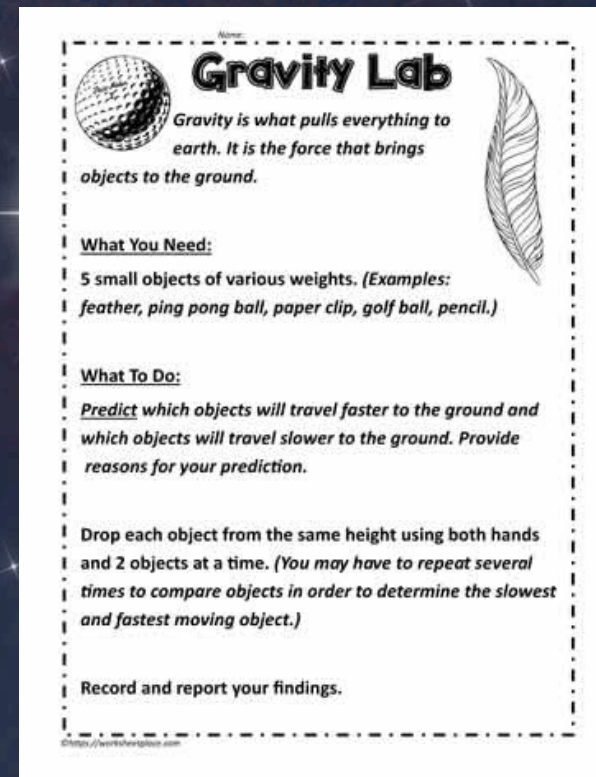

Major Channels : Youtube | Instagram |
Roblox | TV

Youtube Kids - Slightly Better, But still
shallow content, under estimating kids'
ability to grasp deeper concepts...

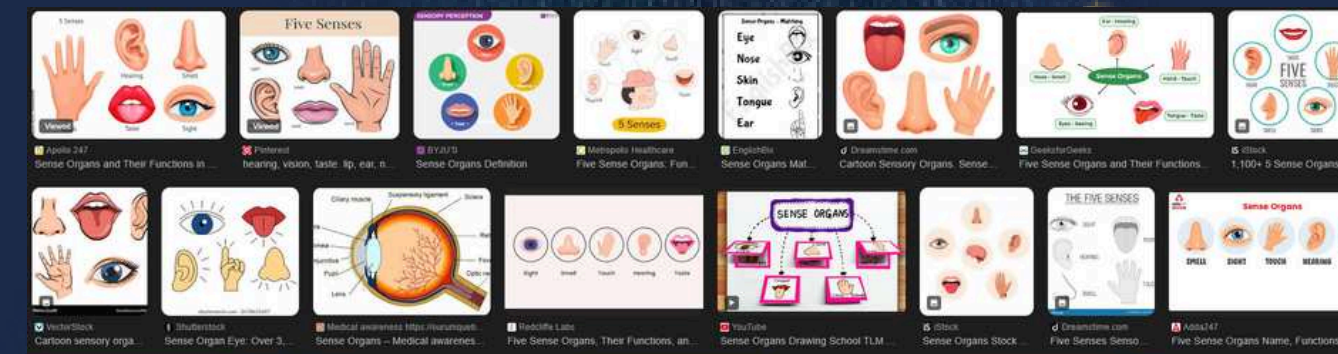

KIDS' EDUCATION - NOT SO GREAT EITHER! WRONG, HALF-BAKED OR OUTDATED KNOWLEDGE!!!

Gravity Drags You Towards The
Center Core Of The Earth.
What's Keeping Us On The
Ground Is The Opposing Force,
To The Gravity, That The Ground
Exerts On Us - Normal Force

Gravity Pulls Everything
Down With The Same
Constant Acceleration, g .
Objects Fall At Different
Speeds Because Of Air
Resistance.

Our Whole Body Is Replete With Sensors. Even Our Teeth Has
Thousands Of Sensors Beneath The Enamel

Not All Dinosaurs Went Extinct, The Kind That Already Adapted To
Fly - Theropods, Lived & They Are Birds Today

*POPULAR LEARNING METHODS ARE
NARROW+ SHALLOW, DISCONNECTED,
EXAMS FOCUSED &
LACKING IN PERSPECTIVES,
SCREEN-DEPENDENT.*

Kids Are Underestimated → Curiosity Crushed

Games, Activities, And Projects As Core Learning Mediums Are
Underutilized

WHY WOULD PARENTS BUY?

Learning Is Far More Effective Through Play

Parents Are Yearning For Well Made Offline Engagement Products For Kids

Outcomes - Kids will do these after they start playing our games:

They Will Start Identifying Science In Every Day Life More

They Will Ponder About The Concepts From The Games Later

They Will Question, They Will Even Start Teaching

They Will Fall In Love With The Subjects & Learning

Great For Gifting

Parents Can Play The Games, Enjoy & Learn Too.

Good Art, Good Design, Good Quality

High Replayability By Gameplay Design + Add On & Extension Pack Launches

+ Where Possible, Modular Designs To Support Our Newer Games On The Same Base Hardware

PRODUCT PIPELINE 1

ESCAPE GRAVITY BOARD GAME

Many Gameplays | Modular To Fit 2+ Players

ACCURATE, ARTISTIC, DETAILED 3D SPIRAL BOARD SPANNING

Core, Mantle, Crust, Surface, Layers Of Atmospheres, LEO, Lagrange Points & Deep Space

Ages 7+

BOARD IS GRAVITY'S AGENT. IT WANTS TO PULL YOU INTO THE CORE & CONSUME YOU...

Roll Dice To Move On Board

→ Draw An Activity Card Per Turn → Perform & Earn A Corresponding Force Card

→ Use These Force Cards On The Right Tiles To Escape Gravity's Pull

→ **Your Goal - Ascend To The International Space Station Orbiting The Earth Around The Low Earth Orbit (LEO)**

DEEP RESEARCHED, EXPANSIVE, COVERS ALL ASPECTS OF GRAVITY

- Gravity According To Relativity Theory
 - Time Dilation From Core To Surface To Deep Space
 - Increase In Force Of Gravity From Core To Surface & Decrease From Surface To Deep Space
 - Gravitational Anomalies Across The Earth's Surface Depending On Below Surface Density
 - Forces Acting Against Gravity - Enabling Life Without Getting Sucked Into The Core
 - Energy & Forces That Can Be Used Against Gravity To Shoot Up Into The Space
 - Gravity & Weight Relationship
- Escape Velocity, Orbital Velocity, 0 Gravity, Lagrange

PULL THE OTHERS - GRAVITY CARD GAME

Shuffle & Distribute Element Cards & Outcome Cards

Play The Element Card That Could 'Drag' Other Cards Played - Figure It Out Based On Mass / Energy.

Refer To Hint Tent To Know How Mass, Energy, Size & Speed Affect Gravity

Predict The Outcome Of The Dragged Object - Verify Your Prediction - Score Extra Points...

LEARN WHAT FACTORS AFFECT GRAVITY → UNDERSTAND HOW GRAVITY INFLUENCES OTHER OBJECTS AROUND

INDIAN HISTORY BOARD GAME

6 Time Periods From 7000 BCE to Today

52+ Empires

500+ Empire Cards Across 20 Categories Including Geography, Lifestyle, Culture, Food, Architecture, Art, Science & Technology, Governance, Routes, Trade, Health, Military, Wars, Money, Locomotion, Education & More

Shuffle & Distribute Cards → Roll The Dice → Land On A Time Period → Play The Relevant Empire Cards → Place Category Tokens On Map At The Right Spots → Go One Step Further & Make Your Own 3D Tokens With Given Air Dry Clay.

Many Gameplays | Modular To Fit 1 or 1+ Players | **Accurate, Artistic, Detailed Map Board** | Deep Researched, Expansive, Up-To Date Empire Card Contents | **Empires From North & South Generally Ignored By Mainstream Content**

SCI. - SCIENTISTS TRADING CARDS

Kids have forever been playing with football, cricket, pokemon & many other trading cards.

Why not Scientists Trading Cards?

- Well Researched & Up-To Date
- Under-dog Scientists & Ideas
- Bias Free Representation
- 1 Sci. Cards Set Launched With Every New Topic/ New Game

Collection Triggers , Trading between kids Through Community

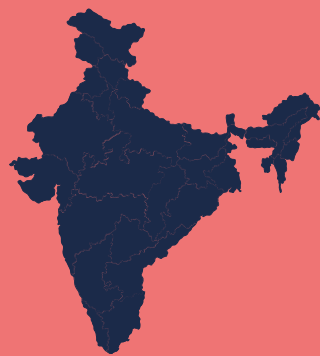

OTHER PLAYERS

Comparable Companies	Example Brands	Age Band & ARR	Primary Model	Product Type	Screen Use	Breadth of Learning	Strengths	Weaknesses
Early STEM / Activity Boxes	Einstein Box, FirstCry IntelliKit, FintoBox	3-10 yrs 10-20 Cr ARR	Subscription & one-time kits	Physical activity boxes	Low	Narrow	Strong offline experience, good parent appeal	Age skew younger, limited subject depth
Mass EdTech Platforms	BYJU'S, Unacademy, Vedantu, Cuemath	5-17 yrs, 200- 1000+ Cr	Digital subscription, live classes	App-based, curriculum delivery	High	Broad (STEM + More)	Scale, content breadth, strong funding	Heavy screen time, expensive, low tactile engagement
Alt Schools (Fully Online)	21K School, K8 School	5-17 yrs 30-40 Cr	Full-time schooling online	Platform-based curriculum	Very High	Full K-12 coverage	School alternative, accredited	Not enrichment; zero tactile / experiential element
Coding Platforms	WhiteHat Jr, Tinker Coders	6-16 yrs, 1000 Cr+	Digital subscription	Coding classes	Very High	Narrow (Coding)	Focused skill development, strong marketing	Limited Subjects, Outcome Over Exploration
Skill & Play-based Brands	Skillmatics, Smartivity, Imagimake, Play Shifu	3-12 yrs. 100 Cr +	One-time products & activity kits	Games, puzzles, skill sheets, DIY Kits, Toys	Low	Narrow-Medium	Good retail presence, attractive products	Subject & Concept Depth Limited, More Technology Focused Than Science Focused
Concepts Delivered in Depth Through Games	DeepKids	6+ Years	Physical Products + Subscription in the future	Games & Books	Low	Expansive (STEM, Art, History, Philosophy)	Screen-minimal, packaged concept wise - delivering unmatched depth & breadth	Needs proof of retention, ops execution

LEARNINGS

Parents who buy from one of the other kids games,kits brands, try the others too

Parents want good off screen products to engage their kids with

Parents need to be sold on the learning outcomes the games will deliver

Parents are ok to pay for good design, good quality

Another Value for money feature - Will kids be engaged for longer durations ? Replayability

Other concerns parents have - Storage , Resale of older games

SUCCESS METRICS & STEPS TO ACHIEVE

LTV & REPLAYABILITY

- Modular Game Play - 1/2+ Players, Many Modes, Built-In Levels
- Extension Packs
- Reusability - New Games With Old Hardware
- Subscription +Circular Economy

ACV & REPEAT PURCHASE

- Products Across Price Ranges & Types Per Topic
- Seasonal releases

REFERRALS

- Built-In Kids' Creations & Output Cues → Insta Shares
- Kid to Kid Referral Mechanism Inbuilt In Gameplays
- Community - Free Micro Services like Movie suggestions, 1 science joke a day to share with kids, etc
- Referral Incentives For Parents
- Influencers - Social Media - Kids & Parents, Teachers

WEDGE & MOAT

WEDGE

Activities That Connect With A Concept Packaged Within A Hands-On Gameplay Narrative Is A New Category ;
Our Focus On Fundamentals & First Principles Rather Than Engineering & Application Is Also Sets Us Apart.
Our Games Are Not The Easiest - By Design - There Are Hardly Any Products That Respects Their Intelligence & Capacity.

We are not experiment kits, or DIY robotic kits.

We are not competing with Skillmatics, Smartivity , etc .

We Co-exist - Parents who buy these are the parents who would also buy ours.

We Will Build Category Defining Flagship Hero Products + Affordable Driving Products

MOAT

We Will Build It.

Each Game Is A Node - Will Build Into An Interconnected Universe Of Games Per Concepts Across Subjects And Different Difficulty Levels

High Replayability + Progressive Depth + Extensions

Collectability + Continuity + Community

MARGINS GROW WITH SCALE

CURRENT BOTTLENECKS & ASKS

1. Need build3 help to find a freelance developer (framer + react) for our website
2. Amru stepping out - But we march on
3. Design phase is long, particularly for the first product - We can start getting preorders from March & have samples tested by Feb end
4. What if I choose to give you an advisory/cofounder % in the company ? - how does that scenario play out?

FAQs

QUESTION	ANSWER
Q1. HOW IS THIS DIFFERENT FROM OTHER EdTECH PLATFORMS?	DeepKids focuses on concept-deep learning using offline games, not screen-based teaching;
Q2. WHY WOULD PARENTS PAY FOR THIS WHEN THERE'S FREE ONLINE CONTENT?	Because parents increasingly want screen-free, structured, engaging ways for kids to learn. DeepKids turns concepts into tangible, interactive learning experiences.
Q3. WHY 3 PRODUCT CATEGORIES?	Product Categories create affordable entry points, increasing Average Order Value. Makes way for subscription in the future, leading to higher LTV.
Q4. WHO IS BUILDING THE CONTENT?	Experienced team with science, tech & education background + Freelance Project Based Product Designers
Q5. HOW BIG IS THE ADDRESSABLE MARKET?	India's after-school learning + homeschooling TAM is growing fast, with millions of parents in Tier 1-2 willing to spend ₹2k-8k/yr - TAM - 1.8-2.4 Bn ; SAM - 600 -850 Mn;
Q6. WHAT IS YOUR MOAT?	Building subject-concept library of games, offline-first experience, strong community positioning & subscription & long term learning tracks in the future.
Q7. WHAT'S YOUR IMMEDIATE ASK?	Accelerator partnership + funding to build breakeven scale, validate CAC/LTV
