Elevator Pitch To Parents:

Deep Kids is a weekly **offline activities journey** for kids, with all activities following the premise that kids are without bias & deep.

Activities will involve **all art forms** ranging from painting, music, pretend play/drama, games, language , science & more
and will be a mix of individual, group, with family or family assisted activities.

Kits will be delivered home weekly & content on how to do the activity will be delivered through an app.

Some example activities:

1. Kids get a kit with primary color paints & 3 torches with primary color lights. They create their own color paints & give their own names & also experiment with combining different light colors. They learn about color & light and how they are connected deeply.
2. Kids form a group & play a pictionary type game, where kids learn how art & communication are closely knit.

Please do help us understand a little better about what kids would love by filling the form with 13 quick questions.

Our Philosophy

Kids are Without Bias & Deep.
They intuitively understand the deepest of the concepts that adults cannot.
We embrace this.

While school, society teaches kids & adults alike to think in categories, to make brain more efficient,to feed knowledge & formulas to live life by,

We want to provide activities, content - own & curated, kits, etc -
to keep them from losing the child;
to give them space & opportunities to think in their natural way, beyond categories, beyond biases.
To help them stay connected with The Self.

How?

Philosophy across all products is the same.
(in the order of building)

1. **Curatedforkids.tv** - Freemium - easy to build on bubble. Curate some 50 movies & videos to launch the site. Eg: Miyazaki, Gods Must Be Crazy, etc , BBC videos, & stuff
   Use these movies content etc to build an audience on social media.
2. **Createdforkids.kits** - Freemium - Activities Kits & Supporting Content
   Every week mapped as journeys to unlock , different paths, active journeys, inactive journeys, activate journeys regularly, all reminders for kids, parents, Supported content, videos for parents , & for kids.
   First 3-4 weeks can be unlocked for free. Subscription model? Or First week free, then join cohort ? or what?
   We could add electronics, physics (deepest stuff like chaos, black holes etc), etc also as journeys - make each of them practical with kits & gamified into activities.
   Journeys & paths can keep branching & go deeper as we want to grow.
3. **Createdbykids.art** - pinterest/insta of kids' arts. Scroll through this instead for parents.
4. **Wonder Why!** - Quora for kids, but audio/video formats
5. **Curatedforkids.art** - Art Museum
6. **Curatedforkids.reading**
7. **Curatedforkids.products** - books, toys, music
8. **Createdforkids.Originals** - Original content (comics, etc) & Kits in collaboration with artists

9. Planned group outdoor activities & trips

Createdforkids.kits

1. Cohort based enrollment, so kids can make friends here , & learn together. Do group activities , etc
2. Every week - supporting content for parents, supporting content for kids, activity explainer video, activity example video
3. Activities, Projects, Competitions, Games, Videos
4. Every Weekend - Yoga for kids , parents can join (paid add on)
5. Every kid will get to see & enjoy all the other kids' art
6. Starting from 4-5 year olds
7. Weekend Funshop! – Art & Crafts ideas/ projects

Starter Art Kit:

1. Drawing book, Canvas book
2. Primary Colors with small empty paint containers & name stickers. Mix & name your own colors
3. Apron for the kid & parents? -
4. Sheets to lay on the ground
5. Wall paper chart at kids height
6. Yoga mat - partner with Juru Yoga
7. Unlock all journeys on app

Week 1

Type: Family Assisted

Path: Week Long

Activity - Communicate like the early humans - Art It! - Draw It, Sing It, Act it, Dance it :

Communicate with art.

You want to ask your mum for chocolate? - Draw it to her, Sing it, or Act it, Dance it

.Example: <do the activity ourselves & record>

Create as much art as you want & Post.

About:

When humans first came about,

Why was communication needed?

How did the first humans communicate?

Pass on important knowledge

Represent thoughts, ideas

Connect Through Art - they drew, sang, danced, acted, spoke, wrote.

<curate clips> For parents & for kids

Week 2

Type: Individual

Path: Week Long

Activity : **Become The Other**

- Imagine you are your mom, dad, anyone of your choice. Enact.
- Imagine you are < > , draw, paint/enact/sing etc emotions for various scenarios.
- See what is common between a monkey & you, between mom & dad, between you & mom, between stone & you. (we are used to analysing how others are different from us. Let's think about how we are the same)
- Better activity?

Create as much art as you want & Post

About:
Communication becomes a little bit complex.
It is not only about our ideas, thoughts, etc.
When we want to share it with another person,
it also becomes important for the other person to understand what you are saying.

We make that happen by coming to a common understanding. We agree what a specific image will represent or mean, we agree what a specific word will mean, etc. & use these commonly agreed associations to communicate.

But communication gets a little bit more complex now.
Although we have agreed upon meanings & systems, how we intuitively perceive & understand each & everything is different.

Even with words. What I think of as happiness for example , what image comes up in my mind, will be different from another. Similarly for every other word. Similarly for other forms of art.

It gets even more complex, as perception becomes a factor of more & more variables, such as biases each of us hold, or even where we are from, etc.

So now, given that communication has layers of complexities, how do we communicate truly with the person near you?

It starts with empathy.

Week 3

Type: Family Assisted
Path: Life Long

Activity: **New Plant Friend**
Kit : Plant kits with seeds. Name the plant. Raise the plant.
<app will give reminders for watering, fertilizing etc & talking to them, singing to them, playing them music , etc>

Take photos & videos everyday.

<this is a journey activity - will continue from this week onwards>

<side journey to be built for plant death scenarios>

About:
You can communicate with anyone & connect. You can communicate with your parents, with teachers, friends, with the other humans in the world, your pet, animals on the street, the plants at your home.

Plants understand you, love you. They feel all the emotions you feel. They are smart & adaptive.

<content, videos , etc for this>

<should arrive at different terms instead of project, class, course, etc etc>

Project 1: **<Name>'s Dictionary -** Art Version —

Type: Individual
Path: Life Long

Words like Love, Joy, Care, Play, Life - Send a dictionary we created with 1 word in each page, for them to draw their meaning for the word & write the meaning also. Leave enough blank pages for them to write their own words.
<this is a journey activity - will continue from this week onwards>

Week 4

Type:
Path:

Activity : ?

About:
There are infinite languages.
Art, painting, music are more subjective languages.
English or hindi or tamil, etc are more objective languages.
Although there is always subjectivity in every thing, in every second.

As we grow up, we start understanding these more objective languages. & start thinking in that language. & the language plays an important role in shaping our thoughts as well. Which is why we had the idea of 0 long before.

<content for this>

Week 5

Type: Individual
Path: Life Long

Activity: **Things are more than what they seem**

1. Draw things like they are not - we know we are limited by perception. Let us take the help of our imagination in this exercise to overcome the limitation of perception
2. Learn to think "not in categories" - Draw 10 houses - make each unique. name each house
3. Draw/Dress up & Act as 10 kids. Individualize each

“Three prisoners have been tied up facing a cave wall since birth. Behind them is a fire that casts shadows on the back wall as people pass by. This is the only reference point the three men have for the world. Eventually, one of the prisoners escapes, runs outside and sees the world for the first time. He’s stunned that there is more than just shadows. But when he tells the others, they don’t understand, and call him crazy. What if the world we know is no more real than shadows on a cave wall?”

Similarly for older kids - 2d world

About:
As we grow, the brain gets more efficient. For which it has to think in categories. It needs to abstract the infinity that life is or universe is. That’s the task of the left brain & an important one. Language , math , science ,etc takes this infinity & provides us abstractions that we can use in life.

But our right brain has a more important function. To update the left brain. But to update the left brain, the right brain needs to work in a different way. It has to operate beyond all the rules, laws, must embrace chaos, contradicting views, ideas. Must be open.

We somehow lose sight of the importance of the right. We incentivise the left. We hone & tune the left. We control & contain the right. The solution is just to remember, right is the master to the left emissary. And now & then challenge our own “category thinking”

Week 6

Type: Family Assisted
Path: Week Long

Activity: **Inside = Outside**
Bring from what outside, what represents you are inside.
More activities ?

About:
Life & Self are interconnected. We are a product of the outside. Outside is the product of us. We perceive the world & just our act of perception alters it.

We can see us in the world & the world in us

Week 7

Type: Family Assisted
Path: Week Long

Activity: **Exceptions Abound**
Think of
Something good , that is bad.

Something bad that is good
Something wrong , but is right
Something right, but is wrong

About:
We are addicted to identity & comes with it the addiction for validation.
But what are these identities that we think we are, we desire & loathe.
Are we really these adjectives we assign to ourselves?

Every moment in life presents some choices & we are free to take any choice.
But , we are not free. Or we don't think so. We feel bound by all the constraints that we don't realize are artificial. But the deepest of these constraints are the ones that we place on ourselves, with the identities we have assumed.
But if it doesn't matter good or bad, right or wrong, moral or immoral, kind or unkind, sensible or insensible, acceptable to the world or not, if none of these existed , what would you choose?
If you are free of your past choices, if you are free to choose anything this moment, irrespective of what you chose in the last, what would you choose?
What would you want to be?

And this freedom exists. Because, we can understand, there is no one way to life. Whatever adjective there is, whatever actions are incentivised, its all structures made by us. It makes things easy. But, the structure also provides room for you to take hold of your freedom & be driven by within, rather than by the processes. It leaves space for you, when you start doing it.

Beyond good & bad, right & wrong, god & evil, is Who We Are, is The Self, Is The Truth

" A new ship – let's call her the Athena – sets sail on a round-the-world trip, waved off by a huge crowd. As time goes by, each part of the ship is replaced: every nut, bolt and plank. Even the crew. When the Athena pulls back into port, the crowd cheer as

vigorously as before. To them, she looks much the same. But are they cheering on the same ship? What makes the Athena the Athena? “

Week 8

Type: Family Activity
Path: Week Long

Activity : **You Say Why**
Kids ask whys to adults all the time. Let’s keep asking the kid why

Each of you paint the same thing. Let the kid judge which is most beautiful. Continue asking why he /she thinks that is beautiful. & continue asking why similarly to every answer.

Do it that week every time you get a chance & record

<app will remind parents now & then to do why bits>

Week 9

Type : Group Activity
Path: Week Long

Activity: **A Zoom meeting like parents have, but obviously better!**
Look at paintings & kids talk about what they see, in a cohort group discussion.

Continue the discussion with your other friends, parents, etc, if you want to.

Project 2: My Masterpieces - Can be anything. Their first art piece of theirs to go on the "Museum of Modern Art - Kids" - we will unveil as a show, let people bid (optional to put on sale) , etc

Week 10

Type **:** Individual
Path : Week 10 - Week 30

Activity**: Become a Collector**
Kit **:** Box & book to collect whatever they are collecting
Collect anything & everything.

Week 11

Type: Group Activity
Path: Week Long

Activity: **Tripping On Music**
Let kids share & listen to each others' music suggestions this week.

Week 12

Type: Family Assisted
Path : Week Long

Activity: **Be Your Own Person**
Do your chores, clean your mess, take care of yourself, take care of others , help with cooking.

Week 13

Type: Family Activity
Path: Week Long

Activity : **Cook with Tunes**
Put your favorite music on & start cooking. Photos of the dish
Kit : Recipes book. Empty pages to make their own recipes

Project 3: Band & Perform

Form a band with anyone: friends, family, cohort friends, animals, strangers, anyone.
Give any name.
Within the band figure out below
Lyrics - Write anything . Anything. Your own words, random words, anything, story, anything. 1 full page
Tune - create any tune of your own
Perform - <create an event out of it>
Instruments - optional

Activity **: “Treasure Hunt”**

Unlock clues to find what to draw/paint/etc

Week 15

Activity : **Changes Changes Everywhere! Changes Changes All The Time!**

Week 16

Activity : Self Painting

Create a comics

Put up a play

Week 30

Activity: **Collection Exchange!**
